

Contents

Introduction	v
Bacteriophages and Their Action on Host Cells, <i>Thomas F. Anderson</i>	1
Viruses, <i>F. M. Burnet</i>	17
Rickettsial Diseases, <i>Harry M. Rose</i>	36
Epidemiology, <i>John R. Paul</i>	52
The Methodology of Medical Genetics, <i>Lancelot Hogben, F.R.S.</i>	63
Anthropology, <i>M. F. Ashley Montagu</i>	94
Immunochemistry, <i>Elvin A. Kabat</i>	120
Enzyme Chemistry and Physiologic Mechanisms, <i>W. Eugene Knox</i>	137
Chemotherapy, <i>Richard O. Roblin, Jr.</i>	154
Microorganisms and Vitamin Research, <i>D. D. Woods</i>	167
The Biosynthesis and Metabolism of Porphyrins. An Illustration of the Use of Isotopes in Biologic and Medical Research, <i>David Shemin and Irving M. London</i>	184
Differentiation and Specialization of Biologic Media, <i>J. P. Peters</i>	205
Kidney Physiology, <i>Robert Franklin Pitts</i>	237
Pulmonary Physiology, <i>Dickinson W. Richards, Jr.</i>	259
Liver Injury, <i>Paul György</i>	273
The Role of Hepato-renal Vasotropic Principles in Experimental Shock, <i>Ephraim Shorr, B. W. Zweifach, R. F. Furchgott</i>	301
Plasma Proteins in the Investigation of Disease Mechanisms, <i>S. Howard Armstrong, Jr.</i>	327
Some Aspects of Red-cell Production, <i>Maxwell M. Wintrobe</i>	344
Endocrinology in Cancer Research, <i>C. P. Rhoads</i>	369
Rheumatic Fever—a Disease for Adventure, <i>Alvin F. Coburn</i>	380

viii CONTENTS

Hypertension, <i>Luis F. Leloir</i>	401
Pediatrics: Nuclear Jaundice (Kernikterus) in Hemolytic Disease of the Newborn, <i>Richard Day</i>	415
Congenital Malformations, <i>Theodore H. Ingalls</i>	422
Galactosemia. Glycogen Storage Disease, <i>Howard H. Mason</i>	429
The Celiac Syndrome, <i>Dorothy H. Andersen</i>	433
The Direction of Surgical Effort, <i>I. S. Ravidin</i>	439
Neurology, <i>Judah Ebin</i>	452
Research in Psychiatry, <i>Karl A. Menninger</i>	466
Some Biochemical Problems in Sanitary Engineering, <i>Abel Wolman</i>	479
