Introduction. L. Tcharkviani, J. Kobilková, J. Bochman	9
1 Epidemiology of uterine cervix cancer in the CMEA countries. L. Tcharkviani, A. Tchaklin, V. Dias	15
1.1 Peculiarities of uterine cervix cancer incidence	16
1.2 High-risk factors of uterine cervix cancer development	33
1.3 Methods of improving early diagnosis and prevention of uterine cervix cancer	40
2 Principles of diagnosis of microinvasive cancer of the cervix uteri	49
2.1 Diagnosis of microinvasive uterine cervix cancer B. Töttösy	49
2.2 Comprehensive clinical diagnosis of microinvasive uterine cervix cancer. V. Kozachenko	54
3 Morphological aspects of microinvasive uterine cervix cancer	63
3.1 Morphological diagnosis of microinvasive uterine cervix cancer. J. Kobilková, K. Motlík, J. Tříška	63
3.1.1 Cytological criteria of microinvasive cancer	63
3.1.2 Histological diagnosis of microinvasive cancer	74
3.1.3 Clinical and pathological correlations	89
3.2 Biological characteristics of preclinical cancer of the cervix uteri. K. Tsanev	91
3.2.1 Cytodiagnosis of precancerous conditions, preclinical and invasive cancer	97
3.2.2 Results of preventive oncogynaecological examination and cytological screening	107
4 Therapy for microinvasive uterine cervix cancer. J. Bochman, J. Vishnevskaya, V. Vinnitskaya, D. Zeldovich	111
4.1 Biological peculiarities of microinvasive cancer and its metastasizing potentialities	111
4.2 Reasons for reducing the extent of therapy	114
4.3 Complications	118
4.4 Microinvasive cancer surgical treatment planning	119
4.5 Intracavitary gammatherapy as an independent method of treatment for microinvasive cancer	122

5	Effectiveness of treatment for microinvasive cancer of the uterine cervix. K. Ebeling, A. Weissbach, K. Bilek	129
5.1	Material and methods	129
5.2	Results	129
5.3	Discussion	138
5.4	Conclusions	142
6	Malignized polyps of the uterine cervix — therapy, prevention. L. Tcharkviani, O. Tchakhoyan	145
