

Contents

About the Conference	5
List of Participants and Their Conference Papers	7
List of Reviewers	15
Selected Papers	17
Lucie Doudová, Zuzana Hübnerová Comparison of Powers of Some Tests in One-Way ANOVA Type Model with Negative Binomial Distribution	19
Michal Fusek, Jaroslav Michálek Statistical Inference of Doubly Left-Censored Samples from Weibull Distribution	31
Isabelle Herlin, Etienne Huot Monitoring Surface Currents from Uncertain Image Observations	41
Isabelle Herlin, Olexander Nakonechnyi, Sergiy Zhuk Minimax Optical Flow Estimation from a Sequence of 2D Images	51
Jan Holešovský, Pavel Popela Stochastic Extensions of a Traffic Assignment Problem	61
Eugene Ivohin, Larysa Adzhubey About Using of Neuron Networks for Fuzzy Financial Data Prediction	71
Jan Kałuski Application of the Stackelberg Duopoly Model to Decision Problem in Mining Enterprises Resolution	79
Iva Krejčová, Vladislav Bína Means of Parallel Programming in Managerial Decision Making	87
Lenka Křivánková Continuous-Time Models in Portfolio Theory	95
Evgeniy O. Lebedev, Hanna V. Livinska Multi-channel Stochastic Networks with Periodical Input Flow	105
Igor M. Lyashenko, Yuriy P. Tadeyev Ecological-Economic Dynamics with Consideration for Intellectual Capital	115
Vasil P. Martsenyuk, Igor Ye. Andrushchak, Nadiya M. Gandzyuk, Nataliya Ya. Klymuk, O. M. Kuchvara, Z. V. Mayhruk Decision Support System for Medical System Research	123
Jan Mazal, Petr Stodola, Miroslav Mašlej, Ivana Mokra Math Modelling of the Tactical Activities	129
Jan Mazal, Petr Stodola, Miroslav Mašlej, Marian Rybansky Integration of the Geographical and Tactical Analyses	135
Eva Mrazková, Michal Mrazek Stochastic Optimization of a Transversely Vibrating Cantilever Beam	141
Jiřı Neubauer, Jakub Odehnal Selected Methods of Economic Time Series Analysis	151

Peter Scheibelhofer, Ernst Stadlober, Guenter Hayderer, Guenter Leditzky
Improvements on Prediction Accuracy and Reliability of a Predictive Maintenance Model
for Semiconductor Fabrication 161

Jaroslav Sklenar, David Stephen Borg, Pavel Popela
Application of Reinforcement Learning in Airline Revenue Management 171

Michaela Vojtová
Optimization of Deterministic Population Dynamics Models 181
