

CONTAIN

ABSTRACT.....	2
CONTAIN.....	3
INTRODUCTION.....	5
1 THE PURPOSE OF RESEARCH.....	6
2 COMPOUND PREPARATION.....	7
3 TESTING METHODS.....	8
3.1 Oil Absorption (DBPA).....	8
3.2 Mercury Intrusion Porosimetry (MIP).....	8
3.3 Vulcanization Characteristics	8
3.4 Hardness Shore A.....	9
3.5 Resilience.....	10
3.6 Tensile Test.....	10
3.7 Tear Strength.....	12
3.8 Abrasion.....	12
3.9 Dynamic Mechanical Analysis (DMA).....	13
4 RESULTS AND DISCUSION.....	14
4.1 Determination of Optimal Concentration of Biopolymer in Silica Filled Compounds.....	14
4.1.1 Vulcanization Characteristics.....	14
4.1.2 Hardness Shore A.....	15
4.1.3 Resilience.....	16
4.1.4 Tensile Test.....	16
4.2 Determination of Optimal Concentration of Crosslinking agent in Silica Filled Compounds..	18
4.2.1 Vulcanization Characteristics.....	18
4.2.2 Hardness Shore A.....	19
4.2.3 Resilience.....	20
4.2.4 Tensile Test.....	20

4.3 Kaolin Filled Compounds and Their Comparison with Silica Filled Compounds	22
4.3.1 Mercury Intrusion Porosimetry and Oil Absorption.....	23
4.3.2 Vulcanization Characteristics.....	24
4.3.3 Hardness Shore A.....	24
4.3.4 Resilience.....	25
4.3.5 Tensile Test.....	26
4.3.6 Tear Strength.....	27
4.3.7 Abrasion.....	28
4.3.8 Dynamic Mechanical Analysis.....	29
CONCLUSION.....	32
