

| Content | P |
|--|----------|
| Introduction | 1 |
| Simulation models of the selective haulage and homogenisation systems | 2 |
| Mathematical model | 4 |
| Process of the mined valorization in the selective haulage way | 6 |
| Simulation program SIMDUL | 8 |
| Simulation model 1 (Lazy mine) | 17 |
| Simulation model 1 task 1 – selective mining | 18 |
| Simulation model 1 task 2 – homogenizing of the coal blend | 23 |
| Simulation model 2 (Darkov mine) | 26 |
| Automation of haulage systems | 31 |
| Automation of tandem conveyors | 31 |
| Automatic decentralized control system of the tandem conveyors | 32 |
| Systems of the rationalization of automated tandem conveyor control | 34 |
| Innovated MJM system | 34 |
| FPZ frequency transfer equipment | 35 |
| AZP-U1 type equipment | 36 |
| Automated control system of continual mine haulage by the control computer | 36 |
| Automation of skip hoist system | 38 |
| System of controlling and safeguarding circuits of skip plant | 39 |
| Automation of the skip filling station | 40 |
| Automation of the skip pocket station | 42 |
| System PROMOS | 43 |
| Summary | 44 |
| References | 44 |
