

## Obsah

|  |    |
|--|----|
| Preface .....  | 0  |
| Introduction .....   | 1  |
| 1. Objectives of the statics .....   | 3  |
| 2. Basic terms and laws of statics .....   | 4  |
| 2.1. Basic terms .....   | 4  |
| 2.2. Basic axioms (laws) of statics .....  | 4  |
| 3. Force systems .....   | 6  |
| 3.1. Determination of a force in a plane .....   | 6  |
| 3.2. Plane beam of forces .....  | 7  |
| 3.3. Moment of a force towards a point .....   | 9  |
| 3.4. Force couple .....  | 11 |
| 3.5. General plane force system .....  | 12 |
| 3.6. Substitution and equilibrium of a system of parallel forces in a plane: .....       | 16 |
| 3.7. Centre – the static centre of the constrained parallel forces; gravity centre ..... | 16 |
| 4. Plane bar systems .....   | 21 |
| 4.1. Basic terms .....   | 21 |
| 4.2. The method of the points of contact .....   | 23 |
| 4.3. The method of step-by-step solution .....   | 24 |
| 4.4. The section (transverse) method .....   | 26 |
| 5. Plane statically definite beams .....   | 29 |
| 5.1. Basic terms .....   | 29 |
| 5.2. Load of plane beams .....   | 30 |
| 5.3. Calculation of reactions .....  | 32 |
| 5.4. Internal forces of plane beams .....  | 32 |
| 5.5. Calculation of the internal forces .....  | 33 |
| 5.6. Course of the internal forces .....   | 34 |
| 5.7. Differential dependences between the internal forces and stress (load) .....        | 34 |
| 6. System of bodies .....  | 43 |
| 6.1. Basic terms .....   | 43 |
| 6.2. Constraints .....   | 44 |
| 6.3. Static determination and movability of the systems .....                            | 47 |
| 6.4. Static solution of the body systems with ideal constraints .....                    | 49 |
| 6.5. Plane systems with real constraints .....   | 52 |
| 6.6. Static solution of the systems with considering the passive resistances .....       | 58 |
| Literature .....   | 62 |
