SECTION I Current issues in digital health

1. Building trust in digital healthcare: Navigating disinformation, AI, ethics, and legal challenges	3
Jan Kalina	
Introduction	3
The erosion of trust through disinformation in healthcare	4
Ethical considerations in digital healthcare	7
Trustworthy AI: Building transparent and fair AI systems	9
Legal aspects of trust in digital healthcare	15
Trust and personalized healthcare	18
Trust and inclusive healthcare	19
Conclusion	20
Acknowledgment	21
References	21
2. Smart healthcare: Setting the new norm moving forward	27
Brian Kee Mun Wong, Sivakumar Vengusamy and Tze-Yin Lim	
Introduction	27
Smart healthcare—past, present, future ideologies	28
Building smart healthcare through advanced technologies space	30
Benefits of smart healthcare for the future	35
Challenges in developing futuristic smart healthcare systems	40
Case study—the role of smart healthcare in transforming chronic disease management: the NHS diabetes prevention program	45
Background: Rising burden of diabetes	45
An introduction to the NHS diabetes prevention program (DPP)	45
Impact and outcomes	46
Challenges and lessons learned	47
Conclusion	48
References	49
Further reading	54

SECTION II Health systems, health workforce, and digital transformation toward more inclusive societies

3. Mobile-based applications for medication management	57
Sanaz Malekzadeh, Haleh Ayatollahi and Esmaeel Toni	
Health information technology (HIT)	57
Mobile health (mhealth) technology	58
Advantages and disadvantages of mhealth	59
Different types of mhealth applications	61
Health information technology and medication management	61
Mhealth technology and medication management	64
AI-assisted medication management applications	68
Examples of mobile applications for medication management	70
Evaluation of mhealth applications	73
Conclusion	78
References	78
4. Monitoring gait deviations using a mobile application for healthcare	87
Emanuel Saldana-Perez, Giovanni Guzmán-Lugo, Norberto Carrillo-García and Magdalena Saldana-Perez	
Introduction	87
State of the art	88
Methodology	92
Results	97
Conclusions	99
Future works	100
References	100
5. Identification of patients benefiting from home health care services and use of IoT and AI to provide required support	103
Samrat Kumar Mukherjee and Ajeya Jha	
Introduction	103
Literature review	104
Result and discussion	109
Conclusion	115
References	116

6. Games and gamification in smart healthcare development	123
Brian Kee Mun Wong, Chin Ike Tan and Tatyana Bastrygina	
Introduction	123
Smart health care and its progress	124
Games and gamification as a transformative tool in smart health care	126
The drivers of implementing games and gamification in smart health care	128
Challenges of implementing games and gamification in smart health care	133
Case studies in gamified smart health care	135
Conclusion	138
References	140
SECTION III National healthcare visions, priorities, and strategies	
7. Covid-19 hotlines/helplines and call centers: A responsive public health strategy	147
Maryam Eslami Jahromi, Haleh Ayatollahi and Ali Ebrazeh	
Health crises	147
Pandemics of viral diseases	149
Covid-19 pandemic	150
Community-based approaches to deal with health crises	151
Health hotlines/helplines and call centers	153
Features of hotlines/helplines/call centers	155
Health hotlines/helplines/call centers services	156
Hotlines/helplines and call centers during the COVID-19 pandemic	157
Evaluation of hotlines/helplines and call centers	161
Conclusion	166
References	167
8. Advances in technology for healthcare monitoring in Latin America: A systematic review	173
Magdalena Saldana-Perez, Yanil Contreras-Jiménez, Miguel Torres-Ruiz and Carolina Palma-Preciado	
Introduction	173
Methods	174
Results	176
Conclusions	194
Acknowledgments	195
References	195

SECTION IV Digital transformation of healthcare services and infrastructures

9. Unveiling behavioral intention to adopt AI devices in healthcare services: Insights from an emerging economy	201
Selim Ahmed, Dewan Mehrab Ashrafi, Md. Nazmus Sakib and Rafiuddin Ahmed	
Introduction	201
Literature review	204
Methodology	207
Results	209
Discussion	214
Implications	215
Conclusion	218
References	219
Further reading	223
10. Advances in liver tumor diagnosis and treatment: Etiology, classification, and the emerging role of artificial intelligence	225
Yana Gaur, Abhay Chaudhary and Ajith Abraham	
Introduction	225
Causes of liver tumors	225
Liver tumor classification	227
Staging of liver cancer	229
Treatment modalities for liver tumors	231
AI in liver tumor and liver cancer diagnosis	234
Research challenges	245
Conclusion	249
References	251
11. Toward effective IoT integration in healthcare ICUs: Addressing challenges through algorithmic onboarding and automation solutions	255
Adi Fux, Shai Rozenes, Luca Carrubbo, Anna Roberta Gagliardi, Mattia Lettieri and Daniela Siano	
Introduction	255
Methodology	261
Results	264
Discussion	269
Conclusion	272

Limitations and future research	273
References	274

SECTION V Recommendations for digital healthcare research agenda and policy

12. The drama of healthcare democratization in the digital era 279

Francesco Caputo and Cristina Cervino

Introduction	279
Theoretical background	281
Conceptual framework	284
A systems-thinking-based conceptual model for representing digital health democratization	287
Discussions and implications	290
Conclusions, recommendations, and future directions for research	292
References	294
Further reading	298

13. IoT in healthcare: Trends, opportunities, and challenges 299

Brian Kee Mun Wong, Foong Li Law and Tatyana Bastrygina

Introduction	299
Healthcare and technology—the foundation and the trends	300
IoT as a transformative tool in smart healthcare	302
Opportunities of integrating IoT in smart healthcare	304
Challenges of integrating IoT in smart healthcare	308
Case study	310
Conclusion	316
References	317
Further reading	322
