

Contents

| | | |
|----------|---|----|
| 1 | Introduction and Methodology | 1 |
| 1.1 | Introduction | 1 |
| 1.2 | Research Objectives and Methods | 3 |
| 1.3 | Methodological Building Blocks | 6 |
| 1.4 | Structure of the Book | 10 |
| | References | 12 |
| 2 | Phenomenology of Crypto-Asset Ecosystems | 17 |
| 2.1 | Introduction | 17 |
| 2.1.1 | From Distributed Consensus to the Internet of Value | 18 |
| 2.1.2 | What Is the Internet of Money? | 20 |
| 2.2 | On a Hunt for Definitions Between Tokens and Crypto-Assets | 21 |
| 2.2.1 | Terminological Notes from an EU and FATF Perspective | 22 |
| 2.2.2 | Tokens: Bridging Techno-Legal Definitional Gaps | 25 |
| 2.2.3 | Taxonomy Initiatives | 27 |
| 2.2.4 | The Regulatory Role of Tokens | 30 |
| 2.2.5 | Cryptocurrencies and Qualification as Legal Tender..... | 31 |
| 2.3 | The Accountability Conundrum: Architectures and Transactions | 34 |
| 2.3.1 | Crypto-Asset Ecosystems: Stakeholders and Socio-Technical Traits | 34 |
| 2.3.2 | Multi-Layered Dynamics: Remarks on Access Control and Governance..... | 36 |
| 2.3.3 | Decentralisation and Non-Centralisation: A Matter of Degree | 37 |
| 2.4 | Theory and Practice at Ever-Changing Crossroads..... | 40 |
| 2.4.1 | Disintermediation Riddles..... | 40 |
| 2.4.2 | The (R)evolution of (Global) Stablecoins and Digital Fiat Money..... | 42 |
| 2.5 | Backing Phenomenology with Conceptual Frameworks | 44 |
| 2.5.1 | Regulation and Crypto-Asset Ecosystems: Reaching Beyond the Complexity | 44 |

| | | |
|----------|--|-----------|
| 2.5.2 | The Crypto-Asset Sphere as an Ecosystem of Socio-Technical (Eco)systems | 45 |
| 2.6 | Conclusions | 47 |
| | References | 48 |
| 3 | Disintermediation and Anonymity | 53 |
| 3.1 | Introduction | 53 |
| 3.1.1 | Encryption, Cyberspace Anonymity and Crypto-Assets | 55 |
| 3.1.2 | Defining the Scope of the Conundrum | 57 |
| 3.2 | Making Sense of Anonymity and Transparency: Two Sides of the Same (Crypto)Coin | 59 |
| 3.2.1 | Conceptual Granularity of Anonymity | 61 |
| 3.2.2 | Context-Specificity of Anonymity: Identifiability and Identification | 62 |
| 3.2.3 | User Anonymity and Ledger Transparency | 64 |
| 3.2.4 | Transparency of Operations and Financial Transparency | 66 |
| 3.2.5 | Pseudonymity and Monetary Fungibility | 67 |
| 3.2.6 | Observer-Dependency and Broadness of the Notion of Anonymity | 72 |
| 3.2.7 | Contextualisation: Privacy and Anonymity | 74 |
| 3.2.8 | Anonymity and Transparency: A Paradox or a Combination? | 76 |
| 3.3 | The Uptake of Enhanced Disintermediation, Atomicity and Impacts on Accountability | 77 |
| 3.3.1 | Atomic Cross-Chain Swaps and Multi-Layered Protocols ... | 78 |
| 3.3.2 | Peer-to-Peer Transactions and the FATF | 80 |
| 3.3.3 | Self-hosted Wallets and Decentralised Custody | 81 |
| 3.3.4 | Decentralised Exchanges and Decentralised Finance | 83 |
| 3.4 | Conclusions | 86 |
| | References | 87 |
| 4 | Obfuscation and Traceability | 95 |
| 4.1 | Introduction | 95 |
| 4.1.1 | Transaction Obfuscation and the Money Laundering Process | 96 |
| 4.1.2 | Anonymity as a Red Flag Indicator | 99 |
| 4.2 | Methods to Obfuscate Financial Flows and the Role of Traceability | 102 |
| 4.2.1 | Anonymity Enhanced Currencies | 105 |
| 4.2.2 | Four AEC Use Cases | 107 |
| 4.2.3 | Crypto-Mixing: The First Type of Crypto-Cleansing | 110 |
| 4.2.4 | Users and a Diversified Bundle of 'Best' Practices | 112 |
| 4.2.5 | Network-Level Anonymity-Enhancements: On-Chain and Off-Chain Layers | 112 |

| | | |
|----------|--|------------|
| 4.3 | Intelligence Strategies: Following Funds Across the Ecosystems | 114 |
| 4.3.1 | Blockchain Forensics: The Unfolding of Different Techniques | 115 |
| 4.3.2 | Analysis of the Transaction Network and the Role of Clustering | 116 |
| 4.3.3 | Machine Learning-Based Approaches to Anomaly Detection | 119 |
| 4.4 | An Accountability-Based Approach to a Socio-Technical Conundrum | 122 |
| 4.4.1 | Obfuscation Red Flags and Crypto-Asset Forensics | 123 |
| 4.4.2 | The Multi-Layered Nature of Accountability in the Crypto-Asset Sphere..... | 125 |
| 4.5 | Conclusions | 127 |
| | References | 128 |
| 5 | AML/CFT and Crypto-Assets: EU Law and Global Standards | 135 |
| 5.1 | Introduction | 135 |
| 5.1.1 | Ratio and Evolution of AML/CFT Regimes..... | 136 |
| 5.1.2 | What About Crypto-Assets? The Dark Web and the Silk Road | 138 |
| 5.1.3 | The Rise and Fall of Darknet Markets and the Present Day | 140 |
| 5.1.4 | Multi-Layered Efforts and Global Financial Standards | 143 |
| 5.2 | International Standards and the Financial Action Task Force..... | 145 |
| 5.2.1 | The FATF and Virtual Assets: Definitions and Timeline..... | 147 |
| 5.2.2 | The Risk-Based Approach and Crypto Regulated Entities: The FATF and the EU | 149 |
| 5.2.3 | An Extensive Array of Obligations: The FATF and the EU | 152 |
| 5.2.4 | From the FATF Standards to Regulatory and Technical Standardisation | 155 |
| 5.3 | The EU AML/CFT Regime for Crypto-Asset Transactions | 158 |
| 5.3.1 | The Involvement of EU Law: From Harmonisation to the 2021 AML Package..... | 159 |
| 5.3.2 | The EU-Wide Rulebook Under Regulation (EU) 2024/1624 | 162 |
| 5.3.3 | Regulation (EU) 2024/1620 and the New AML Authority ... | 163 |
| 5.3.4 | EU Law, International Standards, and AMLA's RTSs | 165 |
| 5.4 | The Crypto Travel Rule and Active Cooperation..... | 168 |
| 5.4.1 | The Travel Rule: FATF Recommendation 16 and Regulation (EU) 2015/847 | 168 |
| 5.4.2 | The Advent of the Crypto Travel Rule: Recent Evolutions ... | 170 |
| 5.4.3 | Regulation (EU) 2023/1113: Self-Hosted Addresses and Other Debates | 173 |

| | | |
|----------|---|------------|
| 5.4.4 | Active Cooperation and the Challenge of Attribution vis-à-vis Disintermediation..... | 175 |
| 5.5 | Conclusions | 178 |
| | References | 179 |
| 6 | Trade-Offs in Central Bank Digital Currencies | 187 |
| 6.1 | Introduction | 187 |
| 6.2 | Overview on Central Bank Digital Currencies | 189 |
| 6.2.1 | CBDC Typology and Drivers | 190 |
| 6.2.2 | History of Domestic and Cross-Border CBDC Projects | 191 |
| 6.3 | The Impacts of CBDC Design Choices | 196 |
| 6.3.1 | What Type of Ledger and What Distribution Model?..... | 196 |
| 6.3.2 | What Type of Wallet?..... | 199 |
| 6.3.3 | How Can End-User Identity Be Managed?..... | 200 |
| 6.3.4 | Can the CBDC Be Transferred Offline? | 201 |
| 6.3.5 | Are Transactions and/or Accounts Tiered? | 202 |
| 6.3.6 | The Public-Private Interplay | 203 |
| 6.4 | AML/CFT Considerations in the CBDC Domain | 205 |
| 6.4.1 | CBDCs and Limits to the Flow of Cash | 206 |
| 6.4.2 | The Privacy and Data Protection Conundrum | 209 |
| 6.4.3 | The Competence for AML/CFT Compliance | 211 |
| 6.5 | Privacy vs. Transparency: The Topical Role of Trade-Offs | 212 |
| 6.5.1 | The Role of Privacy-Enhancing Technologies | 213 |
| 6.5.2 | Classifying Embedded Trade-Offs | 215 |
| 6.6 | Conclusions | 220 |
| | References | 221 |
| 7 | Techno-Regulatory Standards and ‘Through Design’ Approaches | 231 |
| 7.1 | Introduction | 231 |
| 7.1.1 | Technology- vs. Individual Case-Based AML/CFT Regulation..... | 232 |
| 7.1.2 | Categorising Impacts and the Sandbox Model | 233 |
| 7.2 | A Regulatory Methodology for the Crypto-Asset Space..... | 236 |
| 7.2.1 | (Lack of) Accountability and the Teleological Approach..... | 237 |
| 7.2.2 | Managing the Risk of Overfitting: Rules- and Principles- Based Approaches | 239 |
| 7.2.3 | The Impacts of Disintermediation on Regulatory Methodology | 241 |
| 7.2.4 | Identifying the Risks: Rules-Based Indicators | 244 |
| 7.2.5 | Ranking the Risks: The Value of Taxonomies..... | 247 |
| 7.3 | From ‘Code is Law’ to ‘Through Design’ Approaches | 248 |
| 7.3.1 | When the ‘Law’ Meets ‘Code’, Perhaps on a Blockchain | 249 |
| 7.3.2 | Placing the Debate Within the Crypto-Asset Domain | 251 |
| 7.3.3 | Toward a Flexible Understanding of ‘Code Is/As Law’ | 252 |
| 7.3.4 | Regulation-Enabled Compliance Through Design | 255 |

| | | |
|----------|---|------------|
| 7.4 | ‘Through Design’ Techno-Regulatory Standards..... | 257 |
| 7.4.1 | ‘Embedded Compliance’ Between (Dis)intermediation and Institutional Adoption | 258 |
| 7.4.2 | From ‘Regulated Self-Regulation’ to ‘Polycentric Co-Regulation’ | 260 |
| 7.4.3 | From ‘Law + Technology’ to Techno-Regulatory Standards | 264 |
| 7.5 | Use Case: CBCD-Based Machine-to-Machine Payments..... | 265 |
| 7.5.1 | Applying ‘Trade-Offs Through Design’ | 266 |
| 7.5.2 | A Preliminary Model of Techno-Regulatory Integration | 269 |
| 7.6 | The Intervention of EU Law: Notes on Legitimacy and Effectiveness..... | 270 |
| 7.6.1 | Legitimacy and the Need for Uniformity | 271 |
| 7.6.2 | Effectiveness: Standards and Flexibility ‘Through Design’ | 273 |
| 7.6.3 | The Role of the EU in Setting Techno-Regulatory Standards | 274 |
| 7.7 | Conclusions | 275 |
| | References | 277 |
| 8 | Concluding Remarks | 285 |
| 8.1 | Anonymity and an Unwarranted Double Standard | 285 |
| 8.2 | Anonymity-Transparency Trade-Offs in Crypto-Asset Socio-Technical Ecosystems | 287 |
| 8.3 | A Holistic Approach to a Risk-Based Taxonomy Effort | 290 |
| 8.4 | Polycentric Techno-Regulatory Standardisation in the EU | 292 |
| 8.5 | A ‘Regulation-Enabled Compliance Through Design’ Regime | 294 |
| 8.6 | Final Remarks | 296 |
| | Reference | 297 |
