

CONTENTS

The Guest Editors	vi
Preface	vii
Introduction	viii
1. Determinants of the physiological systems responses to muscular exercise in healthy subjects B.J. Whipp, P.D. Wagner, A. Agusti	1
2. Discriminating features of responses in cardiopulmonary exercise testing S.A. Ward	36
3. Patterns of cardiopulmonary response to exercise in lung diseases D.E. O'Donnell, D. Ofir, P. Laveneziana	69
4. Patterns of response diagnostic for cardiac disease P. Agostoni, G. Cattadori	93
5. Equipment, measurements and quality control in clinical exercise testing J. Porszasz, W. Stringer, R. Casaburi	108
6. Laboratory tests R. Gosselink, T. Troosters, D. Langer, M. Decramer	129
7. Walking for the assessment of patients with chronic obstructive pulmonary disease S. Singh	148
8. Reference values in adults L. Puente-Maestu	165
9. Exercise testing in children with respiratory diseases K-H. Carlsen, T. Stensrud	186
10. Exercise testing in the prognostic evaluation of patients with lung and heart diseases P. Palange, R. Antonucci, G. Valli	195
11. Role of exercise testing in defining the response to interventions in chronic obstructive pulmonary disease patients M.A. Spruit, E.M. Mercken, E.F.M. Wouters, A.M.W.J. Schols	208
12. Indications for exercise testing: a critical perspective P. Palange, S.A. Ward	221
