

Contents

Novel Processes

- Set-on-Demand Geopolymer for Concrete 3D Printing Using Ternary Activator 3
Shravan Muthukrishnan, Sayanthan Ramakrishnan, and Jay Sanjayan
- Two-Part Print Head Mixing of Hybrid Alkali-Activated Cement for Buildability Enhancement in 3D Concrete Printing 10
Sayanthan Ramakrishnan, Kirubajiny Pasupathy, Viktor Mechtcherine, and Jay Sanjayan
- Application of Textile Reinforcement for 3D Concrete Printed Structures 18
Akilesh Ramesh, Pathmanathan Rajeev, and Jay Sanjayan
- Influence of Printing Pattern on Bearing Capacity of 3D Printed Concrete Hollow Structures 26
Zhaohui Chen, Zhenyue Wang, Minmao Liao, Junbo Sun, and Xiao Sun
- Exploring the 2.5D SIMTP with the Adaptive Refinement Based on the Nodal Thickness 32
Tejeswar Yarlagadda, Zixin Zhang, Liming Jiang, Pradeep Bhargava, and Asif Usmani
- Automated Force Sensitive Reinforcement for 3DCP 41
Vuong Quoc Nghia, Jian Hui Lim, Nguyen Quang Nam, Bing Lu, King Ho Holden Li, and Quang-Cuong Pham
- Mechanical Properties and Additive Manufacturing of Alkali-Activated Lunar Regolith in Artificial Lunar Environments 50
Zifan Geng, Lizhi Zhang, Zhiwen Wu, Yi Wei Daniel Tay, Sean Gip Lim, and Ming Jen Tan
- Carbon Sequestration with 3D Concrete Printing: Potentials and Challenges 57
Sean Gip Lim, Yi Wei Daniel Tay, Issam T. Amr, Bandar A. Fadhel, and Ming Jen Tan

Modeling, Simulation, and Structural Analysis

- CFD Simulation of Twin-Pipe Pumping Process for 3D Concrete Printing 69
Yaxin Tao, Geert De Schutter, and Kim Van Tittelboom

Effect of Magnetic Intervention Time on the Buildability of Printable Cement and Limestone Pastes Containing Fe ₃ O ₄ Particles	76
<i>Yiyuan Zhang, Karel Lesage, Yi Zhang, Yaxin Tao, and Geert De Schutter</i>	
Improvements in the Printability of Printed Mortar Using In-Situ Polymerization	82
<i>Lijing Shao, Pan Feng, Qi Liu, and Zhaolong Liu</i>	
Active Rheology Control for 3D Printable Cement-Based Materials by Temperature: An Exploratory Study	90
<i>Yi Zhang, Kim Van Tittelboom, Geert De Schutter, and Zhengwu Jiang</i>	
Interfacial Cracking at Layer and Filament Interfaces of 3D Printed Concrete: Experimental and Numerical Studies	98
<i>Wangdui Gerong, Pengfei Wang, Minmao Liao, Zhaohui Chen, and Junbo Sun</i>	
Experimental Study and OpenSees Modelling for Thermal Response of 3D Printed Concrete Exposed to Fires	104
<i>Jinjin Wang, Cheng Chen, Tianwei Chu, Liming Jiang, Vihar Nimje, Tejeswar Yarlagadda, Peijun Wang, and Asif Usmani</i>	
An Analysis of Penetrometer Test Methods for Structural Build-Up in Stiff and Accelerated 3D Concrete Printing Mixtures	113
<i>Atta Ur Rehman, Shaik Inayath Basha, Kichang Choi, Manmin Kang, and Jung-Hoon Kim</i>	
Materials	
Local Stability of Stocky and Slender WAAM Stainless Steel Equal Angle Sections	127
<i>Siân I. Evans, Fangda Xu, and Jie Wang</i>	
3D Printable Low-Carbon Concrete with Nano-silica Pretreated Recycled Fine Aggregates	133
<i>Xuan Liu, Xianrui Chen, Gordon Leung, and Ivan Sham</i>	
3D Printing of Large-Scale Biodegradable Material	139
<i>Yi Wei Daniel Tay, Eugene Soh, Hortense Le Ferrand, and Ming Jen Tan</i>	
High-Performance 3D Concrete Printing with Zeolite	149
<i>Bing Lu, Mingyang Li, Shunzhi Qian, King Ho Holden Li, and Teck Neng Wong</i>	

- Robotic Repair: In-Place 3D Printing for Repair of Building Components
Using a Mobile Robot 156
*Gido Dielemans, Lukas Lachmayer, Noor Khader, Norman Hack,
Annika Raatz, and Kathrin Dörfler*
- Impact of Water to Solids Ratio on Stability, Printability, and Mechanical
Characteristics of 3D Printable Foam Concrete 165
Uday Boddepalli, Biranchi Panda, and Indu Siva Ranjani Gandhi
- Structural Deterioration and Mechanical Degradation of Limestone
Calcined Clay Cement (LC3) Under Elevated Temperature 174
*K. M. Liew, Gen Li, Binbin Yin, Jinhua Sun,
and Venkatesh Kumar R. Kodur*
- Structural Performance of a Large Column with an Outer Shell Formed
by Short-Fiber Reinforced Mortar Extrusion 181
Koji Kinomura, Wenbo Zhang, and Keisuke Kawamura
- Exploration of 3D Printed Concrete With Recycled Fine and Coarse
Aggregates: Material, Equipment and Performance 188
Zhenyuan Lv, Zhenhua Duan, Jianzhuang Xiao, and Guangchao Ji
- Integration of Functional Materials into 3D Printing for Construction 196
*Yi Wei Daniel Tay, Lining Wang, Xiangyu Wang, Tan Kai Noel Quah,
Jian Hui Lim, Mingyang Li, King Ho Holden Li, Ming Jen Tan,
and Teck Neng Wong*
- Effects of Vinyl Acetate and Ethylene Copolymer on Printing
and Mechanical Performances of 3D Printing Cementitious Materials 204
Zhenbang Liu, Mingyang Li, Zhixin Liu, and Teck Neng Wong
- Mechanical Properties of 3D Printed ECC Beams Reinforced with FRP
Mesh 213
Fangming Jiang, Manfang Lin, and Kequan Yu
- Mechanical Behaviour Investigation for the Timber-UHPC Shear
Connector in 3D Printed Concrete Based Composite Beam 222
Xiaoyue Zhang, Wanru Huang, and Zhaohui Chen
- Alkali-Activated Waste Glass-Based Geopolymer Concrete for Digital
Construction 231
*Kirubajiny Pasupathy, Sayanthan Ramakrishnan, Viktor Mechtcherine,
and Jay Sanjayan*

Design, Applications, and Industries

Construction Technology of the Curved ‘Mars House’ Digital Hotel Project in China Using Concrete 3D Printing	241
<i>Xiqiang Lin, Hailong Wang, Xiaoyan Sun, Wael Kikhia, Zhennan Wu, Lu Lan, and Jiawei Zhao</i>	
3D Printing of Tubular Connectors for Space Frame Structures	251
<i>Ashok Kumar Perka, Bijoy Rajak, and Shibashis Ghosh</i>	
Feasibility Study on Reinforcement Placement with a BIM-Enabled Collaborative Robot System	263
<i>Fei Teng, Dong Zhang, Heng Li, and Yiwei Weng</i>	
Branching Structure for Reinforcement Anchorage Produced with Wire and Arc Additive Manufacturing Technique	272
<i>Neira Babovic, Vittoria Laghi, and Harald Kloft</i>	
Evaluation of Extrusion Methods for 3D Concrete Printing	281
<i>Tan Kai Noel Quah, Yi Wei Daniel Tay, Ming Jen Tan, and King Ho Holden Li</i>	
Author Index	289
