Contents

1 Introducing Digital Technologies and Digital Transformation 1

1.1 Introduction 1
1.2 An Overview of Digital Technologies 2
1.3 The Evolution of Computing and Digital Technologies 3
1.4 How Digital Technologies Increase Scale and Productivity 4
1.5 The Transformational Impact of Digital Technologies 7
1.6 The Digital Transformation Phenomenon 14
1.7 Why Digital Transformation is Challenging 16
1.8 A Framework for Understanding Digital Transformation 20
References 27

2 Digital Platforms 29

2.1 Introduction 29
2.2 Types of Digital Platforms 30
2.3 Key Elements of Digital Platforms 35
2.4 Why Some Digital Platforms Dominate Markets 36
2.5 Digital Platforms Versus Value Chain Firms 39
2.6 Why Managers Struggle With Digital Platform Strategy 39
2.7 How to Create Value on Digital Platforms 41
2.8 How to Measure Value on Digital Platforms 44
2.9 Risks for Firms Dependent on Digital Platforms 45
2.10 Why Digital Platforms Fail 47
2.11 Strategies for Reducing the Threats to Digital Platforms 50
References 52

3 The Internet of Things and Digital Transformation 55
3.1 Introduction 55
3.2 The Power of the IoT 56
3.3 The Key Building Blocks of the IoT 57
3.4 The Capabilities of the IoT 58
3.5 How the IoT Impacts Business Functions 60
3.6 How the IoT Transforms Customer Relationships 62
3.7 How the IoT Transforms Supply Chains 65
3.8 The IoT and Servitised Business Models 67
3.9 Privacy and Security Implications Around the IoT 69
3.10 Challenges Around Implementing the IoT 71
3.11 A Framework for Implementing the IoT in Digital Transformation 72
References 79

4 Artificial Intelligence in Digital Transformation: Capabilities, Risks and Ethics 81
4.1 Introduction 81
4.2 AI Overview 82
4.3 Machine Learning 85
4.4 Fixed and Adaptive Algorithms 86
4.5 How AI Capabilities Transform Business Performance 87
4.6 How AI Transforms Process and Product Capabilities 90
4.7 Risks of Applying AI 92
4.8 Practices for Integrating Business, Ethics and Technical Issues Into AI Implementation 95
References 106

5 Managing Data for Business Value in Digital Transformation 109
5.1 Introduction 109
5.2 Business Intelligence, Business Analytics and Data Analytics 110
5.3 Big Data 111
5.4 The Concept of Digital Data Streams 112
5.5 Data Analytics and the Time Dimension 113
5.6 Data Network Effects 114
5.7 Data Management Challenges 115
5.8 A Framework for Managing and Analysing Data to Create Value 116

5.9 Data Analytics Tools for Unstructured Data 121
5.10 Data Analytics Tools for Social Media 123
5.11 Practices for Building Trust and Transparency in Managing Data 124
References 130

6 Digital Innovation 131
6.1 Introduction 131
6.2 Innovation 132
6.3 How Digital Technologies Drive Innovation 133
6.4 How Digital Technologies Transform the Design Process 135
6.5 An Overview of Digital Innovation 138
6.6 How Data Drives Digital Innovation 138
6.7 Challenges of Digital Innovation 140
6.8 A Framework for Understanding the Digital Innovation Process 141
References 150

7 Business Model Innovation 153
7.1 Introduction 153
7.2 The Business Model Concept 154
7.3 Disruptive Innovation 156
7.4 Business Model Innovation 158
7.5 How Digital Technologies Drive Business Model Innovation 162
7.6 Barriers to Employing Digital Technologies in Business Model Innovation 164
7.7 How the Business Model Canvas Can be Employed in Business Model Innovation 165
7.8 How Design Thinking Can be Employed in Business Model Innovation 168
References 172

8 Digital Transformation Strategy 175
8.1 Introduction 175
8.2 Why Digital Transformation Should be Linked with Business Strategy 176
8.3 Digital Transformation and the Strategy Process 177
8.4 A Framework for Understanding Digital Transformation Strategy 178

8.5 Stage 1 Digital Disruption Analysis 179
8.6 Stage 2 Digital Capability Analysis 183
8.7 Stage 3 Digital Transformation Strategy Choice 190
8.8 Stage 4 Implementation, Evaluation and Adaptation 199
References 204

9 Building a Digital Core for Digital Transformation 207
9.1 Introduction 207
9.2 Common Causes of Poor IT Performance 208
9.3 The Digital Core Concept 211
9.4 Digital Maturity Frameworks and the Transition to the Digital Core 212
9.5 The Importance of Modular Architectures in the Digital Core 215
9.6 Practices for Building a Digital Core for Digital Transformation 216
References 229

10 Leading Change in Digital Transformation 231
10.1 Introduction 231
10.2 Leading Change in Digital Transformation 232
10.3 Contextual Change Factors in Digital Transformation 232
10.4 Change Paths in Digital Transformation 238
10.5 Practices for Embedding Change in Digital Transformation 243
References 251
