Contents

1 Introduction to Electric Power Robots 1
1.1 Background and Motivation 1
1.2 Research Status of Electric Power Robots 3
1.2.1 Electric Power Robots for Generation Plants 3
1.2.2 Electric Power Robots for Transmissions 9
1.2.3 Electric Power Robots for Substations 12
1.2.4 Electric Power Robots for Distributions 13
1.3 Challenges Faced by Electric Power Robots 14
1.4 Structure and Arrangement of this Book 16
References 17

2 Intelligent Condenser Cleaning Mobile Manipulator Robot System 21
2.1 Background and Motivation 21
2.2 Structure and Dynamics of Condenser Cleaning Mobile Manipulator Robot 26
2.2.1 Structure and Operating Principle 26
2.2.2 Dynamical Model 28
References 31

3 Control Methods for Condensing Cleaning Mobile Manipulator Robot 33
3.1 Background and Motivation 33
3.2 Robust Adaptive Sliding-Mode Control with a Fuzzy Wavelet Neural Network 35
3.2.1 Fuzzy Wavelet Neural Network 36
3.2.2 Controller Design 38
3.2.3 Simulation Results 44
3.3 Intelligent Force/Motion Tracking Control Using Fuzzy Wavelet Neural Networks 47
3.3.1 Fuzzy Wavelet Neural Networks 48

3.3.2 Recurrent Fuzzy Wavelet Neural Networks 50
3.3.3 Adaptive Force/Motion Control Design on RFWNNs 53
3.3.4 Tracking Position Controller Design 56
3.3.5 Stability Analysis 56
3.3.6 Simulation Results 57
3.4 Intelligent Force/Motion Tracking Control with Recurrent Fuzzy Wavelet CMAC Neural Networks 65
3.4.1 Tracking Position Controller Design 70
3.4.2 Force Constraint Controller Design 74
3.4.3 Stability Analysis 74
3.4.4 Brief Structure of Adaptive FWCMACNN Controllers 78
3.4.5 Simulation Results 79
3.5 Applications of the Condenser Cleaning Mobile Manipulator Robot 86
3.5.1 Design and Experimental Setup 86
3.5.2 Experimental Results of the Control Method for the Condenser Cleaning Mobile Manipulator Robot 89
References 99

4 Transmission Line De-icing Robot Manipulator 103
4.1 Background and Motivation 103
4.2 Modeling of De-icing Robot Manipulator System 107
4.2.1 De-icing Robot 107
4.2.2 Dynamic Models of De-icing Robot Manipulator 112
4.3 Inverse Kinematic Solution for Robot Manipulator 117
4.3.1 Innovative Hybrid Electromagnetism-Like Algorithm for Robot Inverse Kinematics 119
4.3.2 Solving Robot Manipulator Inverse Kinematics with Electromagnetism-like and Modified DFP Algorithms 134
References 146

5 Control Methods for Transmission Line De-icing Robot Manipulator 149
5.1 Background and Motivation 149
5.2 Control Algorithm for Robot Manipulator 150
5.2.1 Self-Organizing Single-Input CMAC Control for Robot Manipulators 150
5.2.2 Adaptive Iterative Learning Control for De-icing Robot Manipulators 159
5.3 Application: De-icing Robot for Transmission Lines 172
5.3.1 Mechanical Design of De-icing Robot Manipulator 172
5.3.2 Adaptive Robust Sliding Tracking Control for Transmission Line De-icing Robot Manipulator 177
References 181

6 Unmanned Aerial Vehicle with Stable Flight for Power Inspection 183
6.1 Background and Motivation 183
6.2 Kinematic and Dynamic Modeling for UAV 184
6.3 Adaptive UAV Controller Under Disturbance and Input Saturation 188
6.3.1 Quadrotor Aircraft Control with Adaptive RBFNNs/Integral Sliding Mode 188
6.3.2 Adaptive and Robust Control of Quadrotors with Input Saturation 198
References 213

7 Unmanned Aerial Robot Manipulation in Transmission Lines and Industrial Pipelines 215
7.1 Background and Motivation 215
7.2 Kinematic and Dynamic Modeling for UAM 218
7.2.1 Kinematic Modeling 218
7.2.2 UAM Dynamic Modeling 222
7.3 Visual Servo Controller for UAM 228
7.3.1 Practical Visual Servo Control for Aerial Manipulation with a Spherical Projection Model 228
7.3.2 Image Dynamic-Based Visual Servo Control for Unmanned Aerial Manipulators with a Virtual Camera 242
7.4 Application: Aerial Manipulation in Transmission Lines and Industrial Pipelines 260
7.4.1 Autonomous Removing Foreign Objects for Power Transmission Line by Using a Vision-Guided Unmanned Aerial Manipulator 260
7.4.2 Reference Optimization-Based Compliant Control for Aerial Pipeline Inspection Using a Hexacopter with a Robotic Contact Device 276
References 296

8 Conclusions and Future Directions 299
8.1 Conclusions 299
8.2 Challenges 300
8.2.1 Technical Challenges 300
8.2.2 Application Challenges 301
8.3 Further Directions 301
