CONTRIBUTORS TO VOLUME II, PART 2.....	v
Contents of Volume I, Part 1.....	ix
Contents of Volume I, Part 2.....	x
Contents of Volume II, Part 1.....	xi
65. Bacterial Fermentation. BY S. R. ELSDEN.....	791
I. Introduction.....	791
II. Fermentation of Carbohydrates and Related Compounds.....	792
III. Fermentation of Nitrogenous Compounds.....	838
66. Enzymes in Detoxication. BY FREDERICK BERNHEIM.....	844
Introduction.....	844
I. Oxidases.....	845
II. Esterases.....	850
III. Acylases.....	856
IV. Miscellaneous Enzymes.....	857
V. Enzymes Synthesizing <i>p</i> -Aminohippuric Acid.....	863
VI. Enzymes Synthesizing Acetylsulfanilamide.....	864
67. Urea Synthesis. BY H. A. KREBS.....	866
I. Introduction.....	866
II. Nomenclature.....	867
III. Urea Synthesis in Tissue Slices.....	868
IV. Urea Synthesis in Tissue Homogenates.....	874
V. Tracer Experiments.....	881
VI. Occurrence of Urea Synthesis.....	883
VII. Inhibitors of Urea Synthesis.....	884
VIII. Urea Synthesis by Mechanisms Other Than the Ornithine Cycle.....	884
IX. Direct Formation of Urea from Amino Acids.....	885
X. Energetics of Urea Synthesis.....	885
68. Peptide Bond Synthesis. BY PHILIP P. COHEN.....	886
I. Introduction.....	886
II. Model Systems Leading to Net Synthesis of Peptide Bonds.....	887
III. Peptide Bond Synthesis or Turnover Using Isotopic Tracers.....	893
69. Enzymatic Synthesis of Glutamine. BY PHILIP P. COHEN.....	897
I. Physiological Importance of Glutamine.....	897
II. Glutaminases.....	897
III. Enzymatic Synthesis of Glutamine.....	898
70. Synthesis of Acetylcholine. Choline Acetylase. BY KLAS-BERTIL AUGUSTINSSON.....	906
I. Introduction.....	906
II. Measurement of Activity.....	907
III. Occurrence of Choline Acetylase.....	908

IV. Enzyme Preparations.....	909
V. Conditions of Optimum Activity.....	909
VI. Coenzyme.....	910
VII. Inhibitors.....	911
Addendum.....	911
71. Oxidative Assimilation by Microorganisms. BY C. E. CLIFTON.....	912
I. Introduction.....	912
II. Manometric Observations on Assimilation.....	914
III. Influence of Poisons on Assimilation.....	918
IV. Carbon Balances in Assimilation Studies.....	920
V. Polysaccharide Synthesis.....	922
VI. Assimilation of Nitrogen.....	923
72. Enzymatic Mechanisms of Carbon Dioxide Fixation. BY SEVERO OCHOA... 	929
I. Introduction.....	929
II. Systems Forming Carbon to Carbon Bonds by CO ₂ Fixation.....	931
III. Biological Function of CO ₂ Fixation.....	1004
IV. Methods and Preparations.....	1007
73. Carbohydrate-Fat Conversion. BY F. L. BREUSCH.....	1033
I. Introduction and Statement of Problem.....	1033
II. Carbohydrates and Their Dissimilation Products as Possible Inter- mediates in Synthesis of Fatty Acids.....	1034
III. Quantitative Relationships of Conversion of Carbohydrate to Fat....	1047
IV. Individual Conditions of Fat Formation.....	1048
74. Photosynthesis in Green Plants. BY WALTER E. LOOMIS.....	1052
I. Introduction.....	1052
II. The Photosynthetic Equation.....	1054
III. Limiting Factors for Photosynthesis.....	1055
IV. Preliminary Dark Reactions.....	1063
V. Intermediate Reactions.....	1065
VI. Products of Photosynthesis.....	1072
VII. Evolution of the Photosynthetic Process.....	1073
75. Bacterial Photosyntheses. BY C. B. VAN NIEL.....	1074
I. Introduction.....	1074
II. Reaction Steps of Photosynthesis.....	1076
76. Nitrogen Assimilation. BY ARTTURI I. VIRTANEN AND NIILLO RAUTANEN... 	1089
I. Introduction.....	1089
II. Assimilation of Molecular Nitrogen.....	1090
III. Assimilation of Inorganic Nitrogen Compounds.....	1109
IV. Conclusions.....	1129
77. Tumor Enzymology. BY JESSE P. GREENSTEIN AND ALTON MEISTER.....	1131
I. Introduction.....	1132
II. Enzymatic Properties of Tumors.....	1132
III. Enzymatic Changes in the Tumor-Bearing Host.....	1168
IV. Concluding Remarks.....	1178
78. Enzyme Technology. BY A. F. LANGLYKKE, C. V. SMYTHE, AND D. PERLMAN	1180
I. Introduction.....	1182
II. Industrial Fermentations.....	1183
III. Enzyme Manufacture.....	1308
IV. Application of Industrial Enzymes.....	1322
AUTHOR INDEX.....	1339
SUBJECT INDEX.....	1392
