| Introduction | |
| The Emerging Infectious Disease Crisis: | |
| Changing a Losing Game | 14 |
| Daniel R. Brooks, Eric P. Hoberg, Walter A. Boeger, and Scott L. Gardner | |
| Section I: The Conceptual Framework | |
| 1 The Stockholm Paradigm Explains the Eco-Evolutionary Dynamics of the Biosphere in a Changing World, Including Emerging Infectious Disease | |
| Salvatore J. Agosta | |
| 2 The Stockholm Paradigm: The Conceptual Platform for Coping with the Emerging Infectious Disease Crisis | |
| Daniel R. Brooks, Walter A. Boeger, and Eric P. Hoberg | |
| 3 Pathogen-Host Phylogenetic Congruence Varies with Paradigmatic Assumptions, Analytical Method, and Type of Association | |
| Valeria Trivellone and Bernd Panassiti | |
| 4 Modeling the Stockholm Paradigm: Insights for the Nature and Dynamics of Emerging Infectious Diseases | |
| Angie T. C. Souza, Sabrina B. L. Araujo, and Walter A. Boeger | |
| Section II: Putting Evolution to Work | |
| 5 Prevent-Prepare-Palliate: The 3P Framework — Integrating the DAMA Protocol into Global Public Health Systems | |
| Orsolya Molnár, Eric P. Hoberg, Valeria Trivellone, Gábor Földvári, and Daniel R. Brooks | |
| 6 The DAMA Protocol: Anticipating to Prevent and Mitigate Emerging Infectious Diseases | |
| Eric P. Hoberg, Walter A. Boeger, Orsolya Molnár, Gabor Földvári, Scott L. Gardner, Alicia Juarrero, Vitaliy Kharchenko, Eloy Ortíz, Wolfgang Preiser, Valeria Trivellone, and Daniel R. Brooks | |
| 7 Document: Pathogen Diversity— Finding Them before They Find Us | |
| Eric P. Hoberg, Valeria Trivellone, Joseph A. Cook, Jonathan L. Dunnum, Walter A. Boeger, Daniel R. Brooks, Salvatore J. Agosta, and Jocelyn P. Colella | |
| 8 Assess: Using Evolution to Save Time and Resources | |
| Daniel R. Brooks, Eric P. Hoberg, Walter A. Boeger, and Valeria Trivellone | |
| 9 Monitoring: An Emerging Infectious Disease Surveillance Platform for the 21st Century | |
| Eloy Ortíz and Alicia Juarrero | |
| 10 All Hands on Deck: Turning Evolutionary Theory into Preventive Policies | |
| Orsolya Molnár, Marina Knickel, and Christine Marizzi | |
| 11 Citizen Science Can Help Prevent Emerging Infectious Diseases | |
| Éva Szabó and Gábor Földvári | |
| Conclusion | |
| Emerging Diseases and Institutional Stumbling Blocks, or Why We Cannot Afford Business as Usual | |
| Daniel R. Brooks and Salvatore J. Agosta | |
