Author Biography *xi*

Preface *xiii*

1	Introduction of Printed Electronics and Smart Packaging	1
1.1	Introduction	1
1.2	PE Technologies	2
1.2.1	What Is PE Technologies?	2
1.2.2	Why Should PE Technologies Be Developed?	2
1.3	Flexible PE Devices	4
1.4	PE for Smart Packaging	7
1.4.1	Food Packaging	7
1.4.2	Drug Packaging	8
1.4.3	Smart Logistics and Supply Chain	9
1.5	Content and Structure of This Book	10
	References	11
2	Mechanisms and Strategies of Smart Packaging	13
2.1	Introduction	13
2.2	Active Packaging	15
2.2.1	Moisture Regulators	15
2.2.2	Modified Atmosphere Packaging	16
2.2.3	Ethylene Scavengers	17
2.2.4	Antimicrobial Active Packaging	18
2.2.5	PCMs-Based Active Packaging	20
2.3	Intelligent Packaging	21
2.3.1	Indicator Technology for Packaging	21
2.3.1.1	Freshness Indicators	22
2.3.1.2	Time–Temperature Indicators	23
2.3.1.3	Temperature Indicators	25
2.3.2	Sensors for Smart Packaging	27
2.3.2.1	Classification and Principle of Sensors	27
2.3.2.2	The Important Characteristics of Sensor	35

2.3.3	Wireless Communication Technologies in Packaging	37
2.4	Why You Need to Use PE?	39
	References	41
3	Printing Methods and Integrated Strategies	47
3.1	Introduction	47
3.2	Conductive Mechanism of Printed Electronic Inks	48
3.3	Manufactural Process of PE Devices	50
3.3.1	Screen-Printed Electronic Technologies	51
3.3.2	R2R Printed Electronic Technologies	53
3.3.2.1	RSP Technology	54
3.3.2.2	Gravure Printing Technology	55
3.3.2.3	GOP and ROP	58
3.3.2.4	Flexographic Technology	60
3.3.3	Inkjet Printed Electronic Technologies	62
3.3.3.1	The Inkjet Printing Methods	62
3.3.3.2	The Challenges of Inkjet Printing Technologies	65
3.4	Postprinting Process	66
3.4.1	Sintering for Flexible Electronics and Smart Packaging	67
3.4.2	Sintering Methods	68
3.5	Techniques and Parameters for PE	70
3.5.1	The Influence of Geometric Dimensions on PE Devices	71
3.5.2	The Influence of Patterning Design	72
3.5.3	The Impact of Geometric Dimensions and Patterning on the Manufacturing Process	73
	References	74
4	Functional Inks and Substrates for Smart Packaging	83
4.1	Introduction	83
4.2	Conductive Inks and Pastes	86
4.2.1	Silver Conductive Inks	87
4.2.1.1	Commercial Ag Pastes	87
4.2.1.2	Ag Nanomaterials-Based Conductive Inks	89
4.2.1.3	Ag-Based Composite Inks	92
4.2.2	Copper Conductive Inks	94
4.2.2.1	Commercial Cu Pastes	94
4.2.2.2	Cu Nanomaterials-Based Inks	95
4.2.3	Other Metal Conductive Paste Inks	95
4.2.3.1	Bimetallic Conductive Inks	96
4.2.3.2	Liquid Metals	97
4.2.3.3	MXene	100
4.2.4	Carbon Inks and Pastes	103
4.2.4.1	CNTs-Based Conductive Inks	103
4.2.4.2	Graphene-Based Conductive Inks	104
4.2.5	Particle-Free Inks	107

4.2.6	Organic Conductive Inks	110
4.3	Printable Semiconductors and Insulator Inks	112
4.3.1	Semiconductor Inks	112
4.3.1.1	Inorganic Semiconductor Inks	112
4.3.1.2	Organic Semiconductor Inks	116
4.3.2	Insulator Inks	118
4.4	Conventional Substrates for PE Devices and Smart Packaging	119
	References	121
5	Printed Tracks for Smart Tags and Packaging	131
5.1	Introduction	131
5.2	Printed Tracks, Interconnected Circuits, and Printed Antennas	133
5.2.1	Flexible Conductive Electrode and Printed Tracks	133
5.2.2	Conductive Patterns and Interconnected Circuits	135
5.2.3	Printed Flexible Antennas in Smart Tags	138
5.3	Printed Flexible Transparent Electrodes	140
5.3.1	Printing the Transparent Conductive Films	140
5.3.2	Printing the Conductive Metal Grids/Mesh	142
5.4	Printed Stretchable Electrodes and Stretchable Interconnects	143
5.4.1	The Selection of Conductive Materials and Ink Preparation	144
5.4.2	Structural Design Optimization	147
5.5	Printed Flexible Heaters for Self-heating Packaging	148
5.5.1	The Fabrication of PFHs	148
5.5.2	The Application of PFHs in Self-heating Packaging	150
	References	152
6	Printed Optoelectronic Devices and Energy Suppliers for Smart Packaging	161
6.1	Introduction	161
6.2	Printed Optoelectronic Devices	163
6.2.1	Printed Flexible Thin-Film Transistors	163
6.2.2	Printed Displays for Information Outputs	167
6.3	Printed Energy Devices for Smart Tags and IPES	171
6.3.1	Printed Flexible Solar Cells	172
6.3.1.1	Copper-Indium-Gallium Selenide Printed Flexible Solar Cells	172
6.3.1.2	Organic PFSCs	173
6.3.1.3	Perovskite PFSCs	174
6.3.2	Printed Supercapacitors	176
6.3.2.1	The Mechanisms of Supercapacitors	176
6.3.2.2	Printing Methods for Flexible Supercapacitors	178
6.3.3	Flexible Printed Batteries	182
6.3.3.1	Printed Lithium-Ion Batteries	183
6.3.3.2	Printed Sodium-Ion Batteries	185
6.3.3.3	Printed Zn-Ion Batteries	187
6.3.4	Flexible Printed Generators	190

6.3.4.1	Printed Triboelectric Nanogenerators and Printed Piezoelectric Nanogenerators	191	4.3.6
6.3.4.2	Printed Hydrovoltaic Generators	194	4.3.1
	References	197	4.3.1.1
7	Printed Sensors and Indicators	207	4.3.1.2
7.1	Introduction	207	4.3.2
7.2	Printed Force Sensors	209	4.4
7.2.1	Printed Strain Sensor	210	References 121
7.2.2	Printed Pressure Sensor	214	Printed Tracks for Smart Tags 5
7.3	Printed Temperature and Humidity Sensors	217	2.1
7.3.1	Printed Temperature Sensor	218	2.2
7.3.2	Printed Humidity Sensor	220	2.2.1
7.4	Printed Piezoelectric and Triboelectric Sensors	223	2.2.2
7.4.1	Printed Piezoelectric Sensor	224	2.2.3
7.4.2	Printed Triboelectric Sensor	225	2.3
7.5	Printed Gas Sensors	227	2.3.1
7.6	Printed Time-Temperature/Gas/Freshness Indicators	232	2.3.2
7.6.1	Printed Time-Temperature Indicators	232	2.4
7.6.2	Printed Gas Indicators	234	2.4.1
7.6.3	Printed Freshness Indicators	235	2.4.2
	References	238	2.5
8	Integrated Printed Electronics Systems	247	2.5.1
8.1	Introduction	247	2.5.2
8.1.1	What and Why Is Integrated Printed Electronics Systems	247	References 121
8.1.2	Challenges Faced by IPES	248	6
8.1.2.1	High-Performance PE Materials	249	Smart Packaging 101
8.1.2.2	Stability and Durability	249	2.1
8.1.2.3	Electronic Packaging	250	2.2
8.1.2.4	System Design and Effective Integration of Different Components	250	Printed Optoelectronic Devices 6
8.1.3	Integration Methods for IPES	251	2.2.2
8.1.3.1	Single-Sided IPES	251	2.3
8.1.3.2	Double-Sided IPES	252	Printed Flexible Solar Cells 123
8.1.3.3	Multilayer IPES	252	2.3.1
8.1.4	The Applications of IPES in Smart Packaging	252	2.3.2
8.2	Printed Multisensor Platform	253	2.3.3
8.2.1	Advantages of Multisensor Integration	253	2.3.4
8.2.2	Challenges of Multisensor Integration	254	Printed Supercapacitors 124
8.2.3	The Integration of Printed Force Sensors	255	2.3.1
8.2.4	The Integration of Printed Force and Temperature Sensors	256	2.3.2
8.2.5	Printed Sensor Array	257	2.3.3
8.3	Wireless Sensor Platforms	261	2.3.4
8.3.1	Common Wireless Transmission Technologies and Their Characteristics	261	Printed Lithium-Ion Batteries 125

8.3.1.1	Zigbee	261
8.3.1.2	Bluetooth	262
8.3.1.3	Wi-Fi	262
8.3.1.4	Ultra-Wideband	262
8.3.1.5	Radio Frequency Identification and Near-Field Communication Technology	262
8.3.2	Printed Sensors with Wireless Communication	263
8.4	E-skin	268
8.5	Self-powered IPES	271
8.6	IPES Tags for Smart Packaging	273
8.6.1	RFID/NFC Tags	274
8.6.2	IPES Tags	277
	References	278

9	Outlooks and Perspectives	283
9.1	Introduction	283
9.2	The Consensus of Smart Packaging	284
9.3	Printed Electronics Technology's Advantages in Manufacturing Smart Packaging Products	286
9.4	Application Scenarios-Driven Smart Packaging Implementation	287
	References	289
