

INTERNATIONAL ASSOCIATION FOR HYDRAULIC STRUCTURES RESEARCH

R E P O R T

on the

Second Meeting, held in Stockholm from 7. to 9. VI. 1948.

TABLE OF CONTENTS.

	page
List of participants	6
Photograph of most of the participants	10
Report on the Meeting	13
Appendix 1: I. Report of the <i>Working Committee</i> on the management in 1939—47	29
II. Report of the <i>Auditors</i> for the years 1939—47	
III. Paper from the <i>Auditors</i> concerning the Finances of the Association	
IV. Letter (proposal concerning films) from Mr <i>Smetana</i>	
V. Invitation from the <i>Government of India, Central Board of Irrigation</i>	
„ 2. Paper I by <i>E. Meyer-Peter</i> and <i>R. Müller</i> : Formulas for Bed-Load Transport	39
„ 3. Papers by <i>L. J. Tison</i> :	65
I: Transport de matériaux de fond	
II: Erosion à l'aval de barrages	
„ 4. Paper by <i>P. Novak</i> : Experimental and Theoretical Investigation of the Stability of Prisms on the Bottom of a Flume	77
„ 5. „ „ Sir <i>Claude Inglis</i> : Historical Note on Empirical Equations, developed by Engineers in India for Flow of Water and Sand in Alluvial Channels	93
„ 6. „ „ <i>H. Chatley</i> : The Distortion of Scales in Models with Loose Beds	107
„ 7. „ „ <i>P. Danel</i> : Charriage en suspension (Suspension Load)	(113)
„ 8. „ „ <i>G. De Marchi</i> : Experiments on Bed Scouring downstream Weirs	145
„ 9. „ „ <i>F. Campus</i> : Deux études de dispositions destinées à prévenir ou réduire l'érosion en aval des barrages	157

Appendix 10.	Papers by <i>L. Liscovec</i> :	169
	I: A Special Form of the Spillway of a Dam enabling the Splitting of the Nappe and Dissipation of its Energy in the Stilling Basin	
	II: Dissipation of the Energy of Water Flowing from underneath the Gates of a Lock	
„	11. Paper I by <i>B. Hellström</i> : Recent Model Tests at the Hydraulic Laboratory, Stockholm	183
„	12. Paper by <i>F. T. Mavis</i> and <i>L. M. Laushey</i> : A Reappraisal of the Beginning of Bed Movement-Competent Velocity	213
„	13. „ „ <i>G. H. Hickox</i> : Prevention of Erosion below TVA Dams	219
„	14. „ „ <i>J. W. Ball</i> and <i>D. J. Hebert</i> : The Development of High-Head Outlet Valves	237
„	15. „ „ <i>J. N. Bradley</i> and <i>J. E. Warnock</i> : The Hydraulic Laboratory a Tool of the Designing Engineer	263
„	16. „ „ <i>G. A. Hathaway</i> : Observations on Channel Changes, Degradation, and Scour below Dams	287
„	17. Paper II by <i>B. Hellström</i> : Messures to Reduce Scour below Dams	309
„	18. Paper II by <i>E. Meyer-Peter</i> and <i>R. Müller</i> : Affouillements en aval des barrages	(317)
„	19. Paper by <i>J. V. Norrby</i> : The Stilling Basin at the Hölleforsen Power Plant	333
„	20. „ „ <i>T. Blench</i> , <i>Mushtaq Ahmad</i> and <i>Nazir Ahmad</i> : Scour in Alluvium below Falls	341
„	21. „ „ <i>N. K. Bose</i> and <i>H. R. Pramanick</i> : Scour below Weirs	351
„	22. „ „ <i>K. K. Framji</i> : Scour below Weirs	361
„	23. „ „ <i>L. Bonnet</i> and <i>J. Lamoën</i> : Etudes expérimentales, au moyen de modèles réduits pour les ports belges de la Mer du Nord	381
„	24. Papers by <i>A. E. Bretting</i> :	399
	I: A Set of Practical Hydraulic Formulae Based on Recent Experimental Research; Comparaison with Older Formulae	
	II: Non dimensional shape number (specified speed) for pumps and turbines based on model law	

Appendix	25.	Paper by <i>L. Escande</i> : Recherches sur le fonctionnement simultané des Barrages Mobiles en déversoirs et en vannes de fond	419
„	26.	„ „ <i>W. Jarocki</i> : Alluvionnements dans les retenues d'eau	445
„	27.	„ „ <i>K. Debski</i> : Rayon de courbure du tracé de la régularisation de la Vistule comme fonction du superflu de la pente	455
„	28.	„ „ <i>J. Cabelca</i> : Investigation of Various Types of Lock Filling	461
„	29. I:	„ „ <i>J. Laurent</i> : Mécanisme de formation des flèches de sable	477
	II:	„ „ <i>P. Calfas</i> : Résumé de son description du Laboratoire Central d'Hydraulique de Maisons-Alfort	
„	30. I:	„ „ <i>E. Scimemi</i> : On the Scours which can appear along the Down-Stream Face of a Dam (aussi en français)	493 (497)
	II:	„ „ <i>C. Ruggiero</i> : Transport de Matériaux de fond d'un cours d'eau, utilisé pour la reconstruction d'une plage en corrosion (résumé par E. Scimemi). Le rapport lui-même est annexé d'après 30:II	(501)
„	31.	„ „ <i>D. Tonini</i> : Afouillement au pied du barrage sur le Brenta à Mignano	513
„	32.	„ „ <i>A. Nizery</i> : Le Laboratoire National d'Hydraulique de Chatou	523

At the end of the Volume: *Register of the Members* } 31. XII. 48. 531
à la fin du Volume: *Registre des Membres* }
