

CONTENTS

CHAPTER I

EQUATIONS OF THE FIRST ORDER AND DEGREE

	PAGE
1. Definitions — — — — —	1
2. Integration — — — — —	3
3. Separation of Variables — — — — —	4
4. The Homogeneous Type — — — — —	6
5. The Equation with Linear Coefficients — — — — —	8
6. Exact Equations — — — — —	10
7. Integrating Factors — — — — —	13
8. The Quotient of Two Integrating Factors — — — — —	15
9. Special Types of Integrating Factor — — — — —	16
10. The Linear Equation — — — — —	18
11. The Bernoulli Equation — — — — —	22
12. The Riccati Equation — — — — —	22
13. Change of Variable — — — — —	24

CHAPTER II

INTEGRAL CURVES

14. Families of Plane Curves — — — — —	27
15. Trajectories — — — — —	29
16. Level Lines and Lines of Slope on a Surface — — — — —	34
17. Singular Points — — — — —	35

CHAPTER III

EQUATIONS OF HIGHER DEGREE

18. The General Integral — — — — —	40
19. The Clairaut Equation — — — — —	42
20. Generalisation—the d'Alembert Equation — — — — —	43
21. Further Generalisation — — — — —	46
22. Equations with One Variable Missing — — — — —	47

CONTENTS

vii

	PAGE
23. Homogeneous Equations	48
24. Geometrical Interpretation of a Differential Equation	50
25. Cusp on the Integral Curve	52
26. Envelope of Integral Curves	53
27. Equation of the Second Degree	55

CHAPTER IV

EQUATIONS OF THE SECOND AND HIGHER ORDERS

28. Reduction of the Order of an Equation	61
29. Equations that do not Involve y	62
30. Equations that do not Involve x	65
31. First Homogeneous Type	67
32. Second Homogeneous Type	69
33. Third Homogeneous Type	70
34. A Special Case of Homogeneity	71
35. First Integral	73
36. Problems Involving Curvature	75

CHAPTER V

LINEAR EQUATIONS

37. Form of the General Integral	79
38. Depression of the Order	81
39. Reduced Equation with Constant Coefficients	82
40. Properties of the Operator $F(D)$	86
41. Pairs of Conjugate Factors	87
42. Repeated Real Factors	88
43. Repeated Complex Factors	90
44. Inverse Operators	90
45. Inverse Operators Relative to a Periodic Function	95
46. Development of an Inverse Operator	98
47. General Integral by Quadratures	100
48. The Euler Linear Equation	101
49. The Laplace Linear Equation	104
50. Variation of Parameters	106
51. Linear Systems with Constant Coefficients	108

CHAPTER VI

SOLUTION IN SERIES

	PAGE
52. Solution Developed as a Taylor Series	112
53. Regular Singularity	115
54. The Hypergeometric Equation	116
55. The Legendre Equation and the Function $P_n(x)$	119
56. Solution for Large Values of $ x $	122
57. The Bessel Equation and the Function $J_n(x)$	124
58. The Function $Y_n(x)$	126
 EXAMPLES	 131
 SOLUTIONS	 138
 INDEX	 145
