PREFACE p. vii

FUNCTIONS OF A COMPLEX VARIABLE p. 1

	PAGE
Complex Numbers	1
Sets of Points in the Argand Diagram	7
Functions of a Complex Variable	9
Regular Functions	11
Conjugate Functions	14
Power Series	17
The Elementary Functions	20
Many-valued Functions	26
Examples I	29

CONFORMAL REPRESENTATION p. 32

Isogonal and Conformal Transformations	32
Harmonic Functions	37
The Bilinear Transformation	40
Geometrical Inversion	43
The Critical Points	45
Coaxal Circles	46
Invariance of the Cross-Ratio	49
Some special Möbius' Transformations	51
Examples II	54

SOME SPECIAL TRANSFORMATIONS p. 57

	PAGE
The Transformations $w = z^n$	58
$w = z^2$	60
$w = \sqrt{z}$	62
$w = \tan^2 (\frac{1}{4}\pi\sqrt{z})$	64
Combinations of $w = z^a$ with Möbius' Transformations	66
Exponential and Logarithmic Transformations	70
Transformations involving Confocal Conics	71
$z = c \sin w$	74
Joukowski's Aerofoil	76
Tables of Important Transformations	78
Schwarz-Christoffel Transformation	80
Examples III	81

THE COMPLEX INTEGRAL CALCULUS p. 85

Complex Integration	85
Cauchy's Theorem	89
The Derivatives of a Regular Function	93
Taylor's Theorem	95
Liouville's Theorem	96
Laurent's Theorem	97
Zeros and Singularities	98
Rational Functions	103
Analytic Continuation	103
Poles and Zeros of Meromorphic Functions	107
Rouché's Theorem	108
The Maximum-Modulus Principle	109
Examples IV	111

THE CALCULUS OF RESIDUES p. 114

The Residue Theorem	114
Integration round the Unit Circle	117

CONTENTS

xi

THE CALCULUS OF RESIDUES—*continued.*

	PAGE
Evaluation of Infinite Integrals	119
Jordan's Lemma	122
Integrals involving Many-valued Functions	126
Integrals deduced from Known Integrals	128
Expansion of a Meromorphic Function	131
Summation of Series	133
Examples V	135

INDEX p. 139
