

xxiv	A PRACTICAL HANDBOOK OF WATER SUPPLY	
		<b>PAGE</b>
	Protection from stock	54
	Quantity of water required for stock	54
	Evaporation losses	55
	Cost	57
	Underground tanks and surface reservoirs	58
	Relation of underground tanks to farm buildings	58
	Pneumatic Tanks	58
	PIPE LINES AND FURROWS	59
	MISCELLANEOUS SOURCES	65
	Condensers; rock pools; dew ponds; condensation of atmospheric moisture; trees and plants; ice storage; steam vents	65
	REFERENCES	72

### CHAPTER III

#### SURFACE WATER SUPPLY (continued)

IMPOUNDED WATER	73
Catchment areas; precipitation and run-off	75
Afforestation of catchment areas	77
Choice of site	80
The foundations of the dam	84
Discharge of flood waters	88
Evaporation losses	90
Prevention of seepage losses	91
Accumulation of silt	93
Cultivation of silted-up reservoirs	94
Conservation of water in silted-up reservoirs	94
Relation of dams to water supply of places downstream	97
Types of dams	98
BRUSH AND BOULDER DAMS	99
EARTHEN DAMS	99
Construction	101
Core walls	102
Closing the dam	107
Withdrawal of water from the reservoir	108
Protection of the banks	110
Cost	111
Small earthen dams in Kenya	112
Shallow reservoirs on alluvial plains	115
LOOSE ROCK DAMS	119
TIMBER DAMS	120
Log dams	120
Pile dams	121

## CONTENTS

	xxv PAGE
Dams of squared timber	121
Crib or crate dams	121
WIRE NET DAMS	122
MASONRY DAMS	123
CONCRETE DAMS	124
REINFORCED CONCRETE DAMS	126
RELATION OF SMALL DAMS TO INTERFERENCE OF WATER SUPPLY	130
WELLS DEPENDENT UPON RESERVOIRS	134
WEIRS	135
Temporary Weirs	136
Semi-permanent Weirs	136
Permanent Weirs	138
REFERENCES	142

## CHAPTER IV GROUNDWATER SUPPLY

ORIGIN OF GROUNDWATER	143
Meteoric and plutonic waters	143
Rainfall, and its dispersal	144
Evaporation	144
Run-off	145
Soil absorption	146
Infiltration of rain water	147
Soil erosion	148
Water-yielding capacity of rocks	149
Quantity of water	150
THE POROSITY AND PERMEABILITY OF ROCKS	151
Porosity and Permeability	152
Forces controlling water in rocks. Gravity and molecular attraction	154
DISTRIBUTION OF GROUNDWATER	156
Zone of saturation, and the water table	156
Perched water body	158
Capillary fringe	159
Zone of aeration	160
Belt of soil water	161
Relation of vegetation to the water table	162
Loss of groundwater due to transpiration of plants	163
Forests and water supply	164
The draining action of forests	168
Depth of water table	169

	PAGE
111 Lower limit of groundwater	170
121 Fluctuations of the water table	171
122 Lowering of water table due to areal desiccation	173
123 Rate of movement of groundwater	175
124 Underground rivers and lakes	176
125 Temperature of groundwater; hot springs	177
Emergence of groundwater; seeps and springs	179
126 Surface relief and groundwater conditions	187
127 Artesian water	188
128 Artesian conditions in crystalline rocks	194
129 Artesian conditions in superficial deposits	197
130 Rock structures and their relation to groundwater	199
<b>KINDS OF ROCKS AND THEIR WATER-BEARING PROPERTIES.—</b>	
131 <b>ORIGIN AND CLASSIFICATION OF ROCKS</b>	<b>208</b>
132 Igneous rocks	208
Sedimentary rocks	208
Metamorphic rocks	209
<b>WATER-BEARING PROPERTIES OF ROCKS</b>	<b>211</b>
Gravel and Conglomerate	210
133 Sand, Sandstone, and Quartzite	211
134 Clay, Shale, and Slate	212
135 Alluvium	214
136 Limestone and related Rocks	217
137 Volcanic Rocks	219
138 Dolerite and Diabase	220
139 Granitic and Syenitic Rocks	226
140 Gneiss and Schist	233
141 Water-boring Results in the Crystalline Rocks of South Africa. Rhodesia, Nyasaland, and Kenya	237
<b>REFERENCES</b>	<b>242</b>

## CHAPTER V

### THE QUALITY OF WATER

142 <b>THE QUALITY OF WATER IN RELATION TO DISSOLVED SALTS,</b>	
143 <b>SILT, AND ORGANIC IMPURITIES</b>	<b>244</b>
144 Source of matter contained in water	244
145 Water for domestic and stock purposes	245
146 Mineral impurities	245
147 Total solids	246
148 Hardness	246
149 Organic impurities	247
150 Temperature of groundwater	248

		PAGE
	Rivers and lakes	248
	Springs	249
	Shallow dug wells	249
	The cleaning of wells	250
	Tub wells; shallow bored wells	250
	Deep wells	252
	Artesian wells	255
	Household filters	256
	Slow sand filters	256
	Miscellaneous filters	259
	CONDENSERS	260
	DISPOSAL OF WASTE WATERS	264

<b>THE EXAMINATION OF WATER</b>		264
Sanitary survey		264
Chemical examination		267
Ammonia		269
Nitrites, nitrates	CHAPTER VI	269
Chlorine	WATER-FINDING METHODS	270
Phosphates	GENERAL	270
Organic matter	WATER DIVINING	271
Hardness	WATER-FINDING MACHINES	271
Alkalinity	GEOLOGICAL AND TOPOGRAPHICAL METHODS	272
Acidity	Ground water	272
Simple test for determination of total solids	Moist ground and seepages	272
Bacteriological examination	Fluorescent rocks	273
Microscopical examination	Topography	275
<b>THE PURIFICATION OF WATER</b>	Coastal areas; sand dunes	277
Sedimentation	Lake beds and beaches	278
Filtration	Wells at high levels	280
Sterilization	River valleys	282
Chloride of lime	The underflow of rivers	284
Tincture of iodine	Dry river beds	285
Potassium permanganate	Rock pools	285
Chlorine tablets	Alluvial fans; cluvium; rock waste	285
Distillation	Sedimentary rocks	286
Boiling of water	Igneous and metamorphic rocks	286
Aeration	Faults; dykes; etc.	287
Softening of water	Artesian wells	288
Removal of iron from water	Absorption of rain water	290
<b>THE SAFEGUARDING OF WATER SUPPLY</b>	Fresh and saline waters	291
Rain water; collection and storage	INDICATORS OF QUALITY	291
Iron tanks. Effect of lead and zinc on stored waters	PHYSICAL METHODS	293
Underground tanks	REFERENCES	294
Reservoirs		295

	PAGE
Rivers and lakes	297
Springs	298
Shallow dug wells	299
The cleaning of wells	310
Tube wells; shallow bored wells	312
Deep wells	313
Artesian wells	313
<b>FILTERS</b>	<b>314</b>
Household filters	314
Slow sand filters	316
Miscellaneous filters	318
<b>CONDENSERS</b>	<b>319</b>
<b>DISPOSAL OF WASTE WATERS</b>	<b>321</b>
<b>REFERENCES</b>	<b>324</b>

## CHAPTER VI WATER-FINDING METHODS

<b>GENERAL</b>	<b>325</b>
<b>WATER DIVINING</b>	<b>327</b>
<b>WATER-FINDING MACHINES</b>	<b>336</b>
<b>GEOLOGICAL AND TOPOGRAPHICAL METHODS</b>	<b>339</b>
Ground mists	339
Moist ground and seepages	340
Efflorescent rocks	341
Topography	342
Coastal areas; sand dunes	343
Lake beds and beaches	345
Wells at high levels	345
River valleys	346
The underflow of rivers	348
Dry river beds	350
Rock pools	351
Alluvial fans; eluvium; rock waste	354
Sedimentary rocks	355
Igneous and metamorphic rocks	355
Faults; dykes, aars	355
Artesian wells	357
Absorption of rain water	357
Fresh and saline waters	357
<b>PLANTS AS INDICATORS OF GROUNDWATER</b>	<b>358</b>
<b>GEOPHYSICAL METHODS</b>	<b>364</b>
<b>REFERENCES</b>	<b>369</b>

## CHAPTER VII

## RECOVERY OF GROUNDWATER

	PAGE
General methods	370
Preservation of well records	370
Maximum development of groundwater resources	372
Fluctuations of water level in wells	372
The spacing of wells; interference of wells	375
The capacity and yield of wells	376
Testing the yield of wells	381
Freezing, blowing, and magnetic wells	383
Primitive water-raising methods	384
Abstraction of groundwater by plants	387
To determine the depth of wells	388
<b>SHALLOW WELLS.—EXCAVATED WELLS</b>	<b>388</b>
Wells in Firm Ground	392
Excavation	392
Blasting	393
Hoisting methods	398
Rate of excavation	404
Excavation below water level	404
Foul air in wells	405
Well linings	407
Timber	407
Timber and steel rings	409
Brick. Masonry	409
Sinking by alternate excavation and lining	412
Well Curbs	413
The use of the curb in well-sinking	417
Stone masonry	420
Vitrified earthenware pipe	421
Concrete	421
Reinforced concrete	422
Iron linings	424
Wells in Loose or Friable Ground	425
Excavation in steps	426
Timber; sheet piling	427
Brick; concrete	432
Iron cylinders	432
Entry of sand beneath edge of impervious lining	433
Wells in river beds	434
The Deepening of Wells	435
Increasing the Yield of Wells	437
Excavated wells	437
Bored wells	439
Dynamiting of bore-holes	439
The Repair and cleaning of Wells	440

	PAGE
SHALLOW WELLS.—BORED AND DRIVEN WELLS	440
Hand-Boring Outfits	441
Auger Wells	443
Punched Wells	443
California Wells	443
Driven Tube Wells	443
Description	446
Sites for driven tube wells	447
Deltas of large rivers	448
River valleys	448
Beaches and coastal dune areas	450
The driving of tube wells	450
Testing the yield	452
DEEP WELLS	453
The Jet Process	454
Hydraulic Rotary Process	454
Rotary Core Drilling	454
Percussion Drilling	456
Comparison of core and percussion drilling	456
WATER RAISING EQUIPMENT	459
Pumps	459
Screw pumps	459
Chain pumps	459
Suction, force, and lift pumps	461
Centrifugal pump	468
Diaphragm pump	468
Pulsometer pump	469
Air lift	469
Hydraulic ram	470
Power Plant	471
The windmill	472
Steam engines	472
Internal combustion engines	473
INFILTRATION TUNNELS; SUB-SURFACE DAMS	474
Infiltration Tunnels and Trenches	474
Collection from seeps and springs	475
Tunnels and trenches cut into medium slopes	477
Tunnels in solid rock	480
Infiltration works near rivers and lakes	480
Sub-Surface Dams	482
Advantage of sub-surface dams	482
Construction	484
DRAINAGE AND RECHARGE WELLS	487
RECHARGE OF GROUNDWATER BY MEANS OF DAMS	491
REFERENCES	492
