

Contents

Section I The Art of Interviewing

Chapter 1 The Interviewer's Questions 3

- Basic Principles 3
 - Symptoms and Signs 6
 - Conducting an Interview 7
 - Basic Interviewing Techniques 9
 - Format of the History 14
 - Concluding Thoughts 25
-

Chapter 2 The Patient's Responses 27

- Responses to Illness 27
 - Responses to the Interviewer 30
 - Influence of Background and Age on Patient Response 33
 - Influence of Disease on Patient Response 37
-

Chapter 3 Caring for Patients in a Culturally Diverse Society 43

- General Considerations 44
 - Specific Cross-Cultural Perspectives 54
 - Traditional Chinese Medicine 63
 - Conclusion 68
-

Chapter 4 Putting the History Together 71

- Interview of Mr. John Doe 71
-

Section II The Science of the Physical Examination

Chapter 5 The Physical Examination 85

- The Basic Procedures 85
 - Preparation for the Examination 87
 - Precautions to Take During the Examination 88
 - The Goal of the Physical Examination 89
-

Chapter 6 The Skin 92

- General Considerations 92
- Structure and Physiology 92
- Review of Specific Symptoms 95
- Impact of Skin Disease on the Patient 97
- Physical Examination 98
- Description of Lesions 103
- Clinicopathologic Correlations 108

Chapter 7	The Head and Neck	135
	General Considerations	135
	Structure and Physiology	135
	Review of Specific Symptoms	138
	Impact of Head and Neck Disease on the Patient	139
	Physical Examination	140
	Clinicopathologic Correlations	144

Chapter 8	The Eye	149
	Historical Considerations	149
	Structure and Physiology	149
	Review of Specific Symptoms	155
	Impact of Blindness on the Patient	156
	Physical Examination	159
	Ophthalmoscopic Examination	172
	Clinicopathologic Correlations	177

Chapter 9	The Ear and Nose	191
	General Considerations	191
	Structure and Physiology	191
	Review of Specific Symptoms	197
	Impact of Deafness on the Patient	202
	Physical Examination	203
	Clinicopathologic Correlations	212

Chapter 10	The Oral Cavity and Pharynx	220
	General Considerations	220
	Structure and Physiology	220
	Review of Specific Symptoms	225
	Impact of a Voice Disorder on the Patient	228
	Physical Examination	228
	Clinicopathologic Correlations	238

Chapter 11	The Chest	248
	General Considerations	248
	Structure and Physiology	248
	Review of Specific Symptoms	252
	Impact of Lung Disease on the Patient	258
	Physical Examination	259
	Clinicopathologic Correlations	271

Chapter 12	The Heart	275
	General Considerations	275
	Structure and Physiology	276
	Review of Specific Symptoms	283
	Impact of Cardiac Disease on the Patient	290
	Physical Examination	291
	Clinicopathologic Correlations	312

Chapter 13	The Peripheral Vascular System	321
	General Considerations	321
	Structure and Physiology	321
	Review of Specific Symptoms	322

Impact of Vascular Disease on the Patient	324
Physical Examination	324
Clinicopathologic Correlations	332

Chapter 14 The Breast 336

General Considerations	336
Structure and Physiology	336
Review of Specific Symptoms	339
Impact of Breast Disease on the Patient	342
Physical Examination	343
Clinicopathologic Correlations	352

Chapter 15 The Abdomen 354

General Considerations	354
Structure and Physiology	354
Review of Specific Symptoms	356
Impact of Inflammatory Bowel Disease on the Patient	362
Physical Examination	363
Clinicopathologic Correlations	386

Chapter 16 Male Genitalia and Hernias 390

General Considerations	390
Structure and Physiology	391
Review of Specific Symptoms	395
Impact of Impotence on the Male	400
Physical Examination	401
Clinicopathologic Correlations	411

Chapter 17 Female Genitalia 418

General Considerations	418
Structure and Physiology	418
Review of Specific Symptoms	423
Impact of Infertility on the Female	429
Physical Examination	430
Clinicopathologic Correlations	442

Chapter 18 The Musculoskeletal System 446

General Considerations	446
Structure and Physiology	447
Review of Specific Symptoms	461
Impact of Musculoskeletal Disease on the Patient	463
Physical Examination	463
Clinicopathologic Correlations	484

Chapter 19 The Nervous System 494

General Considerations	494
Structure and Physiology	495
Review of Specific Symptoms	503
Impact of Chronic Neurologic Disease on the Patient	509
Physical Examination	510
Clinicopathologic Correlations	544

Chapter 20 Putting the Examination Together 550

- The Techniques 550
The Written Physical Examination 556

Section III Evaluation of Specific Patients**Chapter 21 The Pregnant Patient 563**

- General Considerations 563
Structure and Physiology 563
Review of Specific Symptoms 568
Obstetric Risk Assessment 572
Impact of Pregnancy on a Female 574
Physical Examination 574
The Initial Comprehensive Evaluation 575
Subsequent Antenatal Examinations 578
Clinicopathologic Correlations 580

Chapter 22 The Pediatric Patient 583

- General Considerations 583
The Pediatric History 583
Examination of the Newborn 592
Examination of the Infant 610
Examination of the Young Child 621
Examination of the Older Child 628
Examination of the Adolescent 634
Clinicopathologic Correlations 635

Chapter 23 The Geriatric Patient 640

- General Considerations 640
Structure and Physiology 640
Basic Principles of Geriatric Medicine 645
The Geriatric History 646
Impact on the Patient of Growing Old 650
Physical Examination 651
Clinicopathologic Correlations 652

Chapter 24 The Acutely Ill Patient 655

- Primary Survey 656
Secondary Survey 658
The Pediatric Emergency 661

Section IV Putting the Data to Work**Chapter 25 Diagnostic Reasoning in Physical Diagnosis 667**

- Art, Science, and Observation 667
Diagnostic Reasoning from Signs and Symptoms 668

Chapter 26 The Clinical Record 681

- Putting the History and Physical Examination Together 681
The Human Dimension 686

Epilogue 687**Appendices**

- Appendix A Commonly Abused Drugs 689**
Appendix B Signs and Symptoms in Deficiency States 691
Appendix C Conversion Tables 695
Index 697
