

CONTENTS

CHAP.	PAGE
1. THE PHYSICAL BACKGROUND	1
2. THE MOTION OF CHARGED PARTICLES IN ELECTRIC AND MAGNETIC FIELDS	28
3. CATHODE RAY TUBES	57
4. THE SPACE-CHARGE-LIMITED CURRENT IN A DIODE	91
5. THE TRIODE VALVE	107
6. THERMIONIC EMISSION	138
7. THE INITIAL VELOCITIES OF EMITTED ELECTRONS	189
8. MULTI-GRID VALVES	200
9. THE VALVE AS A LINEAR CIRCUIT ELEMENT, PART I : CLASS A AUDIO FREQUENCY AMPLIFIERS	217
10. THE VALVE AS A CIRCUIT ELEMENT, PART II : CLASS A RADIO FREQUENCY AMPLIFIERS	295
11. THE VALVE AS A SWITCH : AMPLIFIERS CLASS B AND C, AND OSCILLATORS	335
12. OSCILLATORS WITHOUT FEED-BACK	378
13. SOME OSCILLATORS FOR VERY HIGH FREQUENCIES	423
14. THE VALVE AS A NON-LINEAR DEVICE : RECTIFIERS, DETECTORS, AND MIXERS	470
15. THE FUNDAMENTALS OF GAS DISCHARGE TUBES	569
16. GAS DISCHARGE TUBES	701
17. PHOTO-ELECTRIC CELLS	816
18. NOISE	899

APPENDIX	PAGE
1. THE KINETIC THEORY OF GASES	935
2. METALS, INSULATORS, AND SEMI-CONDUCTORS	959
3. THE THERMODYNAMICS OF ELECTRON EMISSION	963
4. THE CATCHER CURRENT IN A KLYSTRON	966
5. THE FOCAL LENGTHS OF THIN ELECTRON LENSES	969
6. THE THEORY OF THE MAGNETRON	979
7. BOHR'S THEORY OF THE HYDROGEN ATOM	983
8. EXPERIMENTS	985
9. DATA	1003
General Physical Constants ;	
M.K.S. Units ;	
Properties of the Elements—Atomic Number and	
Weight, Ionisation and Excitation Potentials, Mean	
Free Path of Molecules and Electrons ;	
Saturation Vapour Pressure of Mercury ;	
Properties of a Tungsten Filament—Expansion, Resis-	
tance, Thermionic Emission, Current, Voltage,	
Life, Power Consumption ;	
Melting-Points, Resistivities and Temperature Co-	
efficients of Metals ;	
Thermal Emission and Resistance of Nickel ;	
Thermal and Thermionic Emission of Tungsten,	
Thoriated Tungsten, Molybdenum and Tantalum ;	
Optical Pyrometry Corrections ;	
Colour Temperature of Tungsten ;	
Amplification Factor (<i>Chart 1</i>) ;	
Anode Current and Mutual Conductance (<i>Chart 2</i>)	
ANSWERS TO EXERCISES	1020
NAME-INDEX	1023
SUBJECT-INDEX	1028
