Contents

0 Probability Preliminaries **1**

0.1 Between Zero and One 1

0.2 Counting 2

0.3 Sample Spaces, Events, and Some Simple Probabilities 8

0.4 Some Very Brief Words About Independence and "Disjointness" 11

0.5 A Brief Review of Random Variables, PDFs, and CDFs 14

0.6 The Expected Value, Expectation, or Mean of a Random Variable or a Distribution 28

0.7 The Variance of a Random Variable or a Distribution 32

0.8 Indicator Notation and a Most Useful Appendix 35

0.9 Joint PDFs, Marginals, and Independence 37

0.10 Useful Properties of Expectation, Variance, and Covariance 48

0.11 Conditional PDFs 55

1 MathStat Preliminaries: Four Important Tools for Mathematical Statistics **63**

1.1 Wait. Where are we going? 63

1.2 Important Tool I: Finding Distributions of Transformations of Random Variables 66

1.3 Important Tool II: Bivariate Transformations 78

1.4 Important Tool III: Minimums and Maximums 85

1.5 Important Tool IV: Moment Generating Functions (MGFs) 94

1.6 Postscript: General Order Statistics 112

2 Qualities of Estimators: Defining Good, Better, and Best **127**

2.1 Notation, Statistics, and Unbiasedness 129

2.2 Mean Squared Error and Bias 133

2.3 Convergence in Probability 140

2.4 Convergence In Distribution 158

2.5 The Central Limit Theorem 176

2.6 The Sample Variance 187

2.7 Postscript: Convergence in Probability for Vector-Valued Random Variables . 189

3 A "Mostly Normal" Introduction to Confidence Intervals **197**

3.1 A Confidence Interval for the Mean of a Normal Distribution: σ^2 is Known . 197

3.2 An Approximate Large Sample Confidence Interval for the Mean of Any Distribution 203

3.3 A Confidence Interval for the Mean of a Normal Distribution: σ^2 is Unknown and Sample Size is Small 205

3.4 A Difference of Means 214

3.5 General Confidence Intervals 225

4 A "Mostly Normal" Introduction to Hypothesis Testing **235**

4.1 Getting Started, Some Intuition 236

4.2 Hypotheses: Simple or Composite? 237

4.3 Errors in Hypothesis Testing for a Simple Null Hypothesis 238

4.4 Finding a Test: A Simple Null Hypothesis 241

4.5 Finding a Test: A Composite Null Hypothesis 243

4.6 Non-Normal Distribution Hypothesis Tests 257

4.7 Power Functions 264

5 Estimation **275**

5.1 Method of Moments Estimators (MMEs) 275

5.2 Maximum Likelihood Estimators (MLEs) 284

5.3 The Cramér-Rao Lower Bound (CRLB) 299

5.4 Asymptotic Properties of MLEs 312

5.5 Uniformly Minimum Variance Unbiased Estimators (UMVUEs) 327

5.6 Minimal Sufficient Statistics * 362

5.7 Ancillary Statistics and Basu's Theorem 370

5.8 Postscript: The Multi-Dimensional Cramér-Rao Lower Bound 381

6 General Hypothesis Testing **399**

6.1 Language and Notation 399

6.2 The "Best" Test 401

6.3 Uniformly Most Powerful Tests (UMPs) 412

6.4 Generalized Likelihood Ratio Tests (GLRTs) 424

6.5 Wilks' Theorem 439

A Tables of Distributions **455**

B The Jacobian and a Change of Variables **458**

B.1 The Jacobian 458

B.2 A Bivariate Transformation 460

B.3 More Variables 461

C Standard Normal, t, and χ^2 Tables **462**

Index **465**

List of Symbols **468**
