

BRIEF CONTENTS

Acknowledgments	xix
Introduction	xxi
Chapter 1: Building and Training Your First Neural Network	1
Chapter 2: Capturing Trends and Recognizing Patterns with Dense Neural Networks	51
Chapter 3: Processing Images with Convolutional Neural Networks	95
Chapter 4: Enhancing, Generating, and Analyzing Data with Autoencoders	167
Chapter 5: Segmenting and Analyzing Images with U-Nets	209
Chapter 6: Training Neural Networks with Self-Supervised Learning	251
Chapter 7: Processing Time Series and Language with Recurrent Neural Networks	279
Chapter 8: Processing Language and Classifying Images with Attention and Transformers ..	325
Chapter 9: Creating and Transforming Images with Generative Adversarial Networks	375
Chapter 10: Implementing Generative AI with Diffusion Models	425
Chapter 11: Modeling Molecules and Complex Systems with Graph Neural Networks	475
Chapter 12: Continuously Improving Performance with Active Learning	529
Chapter 13: Mastering Decision-Making with Deep Reinforcement Learning	557
Chapter 14: Predicting Chaos with Reservoir Computing	601
Conclusion	623
Index	625
