

CONTENTS

Introduction	7
1 Theoretical Background	9
1.1 Paradigmatic Foundations and Conceptual Genesis of Industry 5.0	9
1.2 Pillars of Industry 5.0	12
1.3 Theoretical Implications of the Pillars	16
1.4 Technological Foundations and Digital Architecture	18
1.5 Assessing Maturity Levels in the Context of Industry 5.0	20
1.5.1 <i>Dimensions and Indicators of Maturity</i>	21
1.5.2 <i>Assessment and Validation Methodologies</i>	21
1.5.3 <i>Research Gaps and Future Challenges</i>	22
1.6 Industry 5.0 and Society 5.0: Linking Industrial and Societal Transformation.....	22
1.7 Integrated Theoretical – Conceptual Framework	24
1.7.1 <i>Conceptual Framework: Evolution of Industrial Paradigms</i>	26
1.7.2 <i>Limitations of the Proposed Model</i>	28
1.8 Bibliometric Analysis	29
2 Research Aim and Objectives	35
3 Research framework and Methodology	36
3.1 Conceptualisation of the Research Process Model	36
3.2 Research Questions	37
3.3 Research Model.....	38
3.4 Empirical Data Analysis	40
4 Research Results	42
4.1 Data Collection	42
4.2 Current State of Digital Transformation	45
4.3 Readiness for the Integration of Industry 5.0 Elements	51
4.4 Factors Influencing the Implementation 5.0.....	60
5 Summary of Findings and Discussion	71
5.1 Summary Evaluation of Digital Transformation	71

5.2 Comprehensive Assessment of Enterprise Readiness for Industry 5.0	72
5.3 Comprehensive Assessment of Factors Influencing the Implementation of Industry 5.0	73
5.4 Practical Implications and Recommendations for Enterprises in the Context of Industry 5.0	74
5.4.1 Recommendations for Micro-Enterprises	75
5.4.2 Recommendations for Small Enterprises	76
5.4.3 Recommendations for Medium-Sized Enterprises	77
5.4.4 Recommendations for Large Enterprises	78
5.5 Research Limitations	79
Conclusion	82
References	84
