

CONTENT

| | |
|--|-----|
| List of symbols and abbreviations | 11 |
| List of quantities and units | 12 |
| Introduction | 13 |
| 1 Introduction to the sector | 15 |
| 1.1 Summary of the impact of the crisis period on the sector | 17 |
| 1.2 Environmental, social and corporate governance | 18 |
| 2 Decarbonisation | 24 |
| 2.1 Climate change..... | 24 |
| 2.2 Greenhouse gases – emissions | 25 |
| 2.3 Legal framework | 35 |
| 2.4 Global climate change and decarbonisation goals | 36 |
| 2.5 European Union and its position on climate change..... | 37 |
| 2.6 European Emissions Trading System..... | 42 |
| 2.7 Carbon Border Adjustment Mechanism | 45 |
| 2.8 Slovakia and its position on climate change..... | 49 |
| 2.9 Slovakia from the perspective of industrial decarbonisation | 50 |
| 3 Metallurgical industry | 58 |
| 3.1 Emission and energy intensity of metallurgical processes | 59 |
| 3.2 Current state of steel production in the world | 65 |
| 3.3 Current state of steel production in the European Union | 75 |
| 3.4 Current state of steel production in Slovakia | 82 |
| 3.5 Position of major European steel companies on decarbonisation | 84 |
| 3.6 Production of CO ₂ emissions in selected metallurgical companies and analysis of their development | 85 |
| 4 New trends in iron and steel production | 111 |
| 4.1 Low carbon steelmaking technologies for primary steel production | 112 |
| 4.2 Optimisation of the existing technological cycle | 118 |
| 4.3 Leaders in technology | 124 |

| | | |
|----------|--|------------|
| 4.4 | Predicting the development of metallurgical processes | 126 |
| 4.5 | Potential risks of metallurgical industry decarbonisation | 134 |
| 4.6 | Financial resources for the transformation of the metallurgical industry | 138 |
| 5 | Analysis and scenarios for the future development of steelmaking | 140 |
| 5.1 | Analysis of low-emission iron and steel production: technology options, economic, environmental and energy assessment | 143 |
| 5.1.1 | Economic and technological analysis of steelmaking processes based on technology implementation | 148 |
| 5.1.2 | Strategic challenges and regulatory implications on scrap availability in the European steel industry | 158 |
| 5.1.3 | Energy and technological analysis of innovative steelmaking processes | 165 |
| 5.2 | Analysis of scenarios of the future development of steel production until 2050 | 168 |
| 5.3 | A case study on the future development of steel production until 2034 | 178 |
| 5.4 | Impact of the dynamic allocation system [EU ETS phase 4 (2021–2030)] on the scenarios of production development after 2030 | 179 |
| 5.5 | Allocation of allowances under EU ETS by 2034 – Carbon Border Adjustment Mechanism CBAM | 183 |
| 5.6 | Dynamic allocation – models | 185 |
| 5.7 | Transformation of the production process according to the share of technology | 192 |
| 5.8 | A case study on the future development of steel production | 193 |
| 5.9 | Discussion | 205 |
| | Conclusion | 210 |
