

CONTENTS

CHAPTER I

PARTIAL DERIVATIVES

	PAGE
1. Functions of Two Variables	1
2. Functions of Three or More Variables	6
3. Higher Partial Derivatives	8

CHAPTER II

CHANGE OF VARIABLE IN PARTIAL DIFFERENTIATION

4. Total Derivatives	13
5. Second Derivatives	17
6. Derivatives in Any Direction	26
7. Euler's Theorems on Homogeneous Functions	28
8. Jacobians	31
9. Differentials	36
10. Functional Dependence	43
11. Problems on Change of Variable	46
<i>Examples</i>	50

CHAPTER III

TAYLOR'S THEOREM AND GEOMETRICAL APPLICATIONS

12. Taylor's Theorem for a Function of Several Variables	57
13. Applications to the Theory of Plane Curves	61
14. Applications to Curves and Surfaces in Space	68
15. Curvilinear Coordinates	73
16. Vectors	76

CHAPTER IV

MAXIMA AND MINIMA

	PAGE
17. Functions of a Single Variable	80
18. Functions of Two Variables	81
19. Functions of n Variables	88
20. Lagrange's Method of Undetermined Multipliers	89
<i>Examples</i>	101

APPENDIX

IMPLICIT FUNCTIONS	104
