

CONTENTS

<i>Preface</i>	<i>vii</i>
1 Introduction	1
PART 1	
Basics of qualitative and quantitative content analysis and empirical research	19
2 Definitions of qualitative and quantitative content analysis, and inductive and deductive research approaches	21
3 Know your data: possibilities and limitations of text, numeric, video, and pictographic data, and primary and secondary studies	41
4 Research quality conventions: a guide for good quality empirical research	61
5 Data interpretation: a practical guide	105

PART 2

Practical guide to classical qualitative content analysis and semi-automated quantitative content analysis 143

- 6 Deductive qualitative content analysis 145
- 7 Introduction to inductive qualitative content analysis 174
- 8 Introduction to quantitative content analysis 208
- 9 Deductive quantitative content analysis: a bibliometric literature review 238
- 10 Artificial intelligence and large language model-powered chatbots to support qualitative content analysis 271

PART 3

Practical guide to automated big data content analysis 299

- 11 Automated content analysis: basic concepts and useful tips prior to data collection and data analysis 301
- 12 Getting started with Python 323
- 13 Data preprocessing 356
- 14 Introducing and exploring a dataset statistically 385
- 15 Automated content analysis using relational methods 407
- 16 Sentiment analysis 482
- 17 Topic modeling with Latent Dirichlet Allocation 525
- 18 Topic modeling with BERTopic 558
