

List of abstracts

Plenary lectures

A-371-1:	Functional and structural fatigue of NiTi Shape Memory Alloys G. F. Eggeler	31
A-89-1:	HVEM-tomography for crack tip dislocations M. Tanaka, K. Higashida	32
A-149-1:	Strength and microstructure in nano-laminates A. D. Rollett	33
A-428-1:	Plastic deformation and mechanism of nanotwinned metals L. Lu	34
A-659-1:	Natural and engineering materials for structural applications, outline of a comparison and a roadmap for inspiration for “architected materials” Y. Bréchet	35
A-378-1:	Yield and creep mechanisms in superalloys C. Rae, Y. Wang-Koh, N. Tabrizi, O. Messé	36
A-507-1:	Watching things fail: In-situ electron microscopy of fracture and flow B. Kapelle, B. Roos, G. Richter, A. Kelling, C. Meckenhäuser, C. A. Volkert	37
A-384-1:	STEM optical sectioning for imaging screw displacements in dislocation core structures P. D. Nellist, H. Yang, J. G. Lozano, T. J. Pennycook, P. B. Hirsch	38

Invited & contributed presentations

A-1-1:	Coarse-graining the atomistic view of plasticity of BCC metals R. Gröger, V. Vitek	41
A-3-1:	Strength of advanced ceramic laminated structures Z. Chlup, R. Bermejo, H. Hadraba, L. Malíková, O. Ševeček, R. Danzer, I. Dlouhý	42
A-4-1:	An analysis of migration of low-angle dislocation boundaries with 3D discrete dislocation dynamics T. Zálezák, A. Dlouhý	43
A-5-1:	Ab initio study of transition-metal disilicides under extreme loading conditions M. Friák, D. Legut, M. Šob, J. Neugebauer	44
A-5-2:	Theory-guided design of high-performance superlattices containing metastable phases exemplified by nano-scale CrN/AlN D. Titko, D. Holec, P. Choi, P. Eisenlohr, D. Raabe, J. Neugebauer	45
A-23-1:	Effect of the grain size on the accumulation of dislocations at deformation of micro- and meso- level polycrystals N. A. Koneva, N. A. Popova, E. V. Kozlov	46
A-23-2:	Effect of grain size on storage and distribution of defects at plastic deformation of polycrystal FCC alloys on basic of copper N. A. Koneva, L. I. Trishkina, E. V. Kozlov	47
A-26-1:	Effect of hydrogen trapping on the strength of HSLA welds in sour services B. Beidokhti	48
A-33-1:	Effect of addition of Mo and C on microstructure and properties of TiAl alloys with high Nb content A. Chlupová, T. Kruml, M. Heczko, P. Beran, J. Polák	49
A-33-2:	On the relation of microstructure and low-cycle fatigue properties of 301LN austenitic stainless steel after reversion annealing A. Chlupová, J. Man, J. Polák, P. L. Karjalainen	50

Table of contents

A-37-1:	Sublattice preference of alloying elements in Co_3Nb and Co_3V compounds S. Joshi, K. V. Vamsi, S. Karthikeyan	51
A-40-1:	Dislocation processes in CoCrFeMnNi - a compositionally complex high-entropy alloy R. Gröger, M. Friák, F. Otto, E. P. George, A. Dlouhý	52
A-40-2:	Creep in CoCrFeMnNi - a compositionally complex high-entropy alloy M. Kuběnová, N. Luptáková, M. Dudová, E. P. George, A. Dlouhý	53
A-41-1:	On the mechanism of mechanical mixing in Cu-Co composites studied by transmission electron microscopy and atom probe tomography A. Bachmaier, H. Aboulfadl, M. Pfaff, F. Mücklich, C. Motz	54
A-44-1:	Discontinuous yielding in ultrafine grained metals N. Tsuji	55
A-48-1:	Analysis of the electrochemical dissolution characteristics of high-strength particle reinforced aluminium matrix composites A. Schubert, M. Hackert-Oschätzchen, N. Lehnert, A. Martin, G. Meichsner	56
A-57-1:	Grain size dependence of Bauschinger effect in ultrafine grained aluminum fabricated by ECAP and subsequent annealing D. Terada, K. Yoshino, Z. Horita, N. Tsuji	57
A-58-1:	In-situ study of early fatigue damage of nickel based superalloy at higher temperature M. Petrenec, J. Polák, T. Šamořil, J. Dluhoř, K. Obrtlík	58
A-58-2:	Recrystallization EBSD study of in-situ tensile/heating of Al alloy H. S. Ubhi, M. Petrenec, N. Othen	59
A-58-3:	Accumulation of damage in superelastic NiTi wire subjected to tensile cycling in simulated biofluid J. Racek, M. Stora, P. Šittner, L. Heller, M. Petrenec	60
A-58-4:	In-situ characterization of the development of local strains during tensile deformation of partially recrystallized copper F. X. Lin, H. S. Ubhi, M. Petrenec, Y. B. Zhang, D. Juul Jensen	61
A-62-1:	Compositionally complex alloys (High Entropy Alloys) as high temperature materials? H. Daoud, A. Manzoni, R. Völkl, N. Wanderka, U. Glatzel	62
A-63-1:	Creep of single crystal nickel based superalloys - the matrix plays a central role R. Völkl, E. Fleischmann, E. Affeldt, U. Glatzel	63
A-64-1:	Deformation behavior immediately after indentation load change in ultrafine-grained Al-Mg solid-solution alloys H. Takagi, M. Fujiwara	64
A-65-1:	Multilevel approach to the experimental study of plastic deformation of HCP-Zirconium alloys T. Poletika, S. Girsova	65
A-65-2:	Structure of the near-surface layer of NiTi on the meso-and micro-scale levels after ion-beam surface treatment L. Meisner, T. Poletika, S. Meisner, A. Tverdichebova, S. Girsova	66
A-66-1:	Effect of dynamic strain ageing on creep in Ti alloy – IMI 834 P. Agrawal, K. Subramanian, D. Banerjee	67
A-67-1:	Interplay between dispersion and Hall-Petch strengthening in ferritic alloys M. Heilmaier, S. Seils, D. Schliephake, J. N. Wagner	68
A-70-1:	Study of tension-compression asymmetry in Mg and Mg alloys using viscoplastic self-consistent simulations S. S. Gour, N. P. Gurao	69

A-74-2:	Time and temperature dependence of liquid-gallium embrittlement of polycrystalline tin K. Arai, H. Koizumi	70
A-75-1:	Investigation on the effect of thermal activation of plastic flow on strain hardening analysis G. Angella, R. Donnini	71
A-75-2:	Modelling dynamic recrystallisation in single peak flow curves G. Angella	72
A-76-1:	Interaction of prismatic dislocation loops with free surface in BCC metals J. Fikar, R. Gröger, R. Schaublin	73
A-77-1:	ECAP and rolling - the influence of deformation path on strain distribution at severe plastic deformation A. M. Kliauga, V. L. Sordi, N. S. de Vicentis, R. E. Bolmaro, N. A. Schell, H. Brokmeier	74
A-78-1:	High temperature strength and creep properties of new wrought γ/γ' Co-base superalloys S. Neumeier, L. Freund, M. Göken	75
A-80-1:	New-generation Fe-Al based ODS alloys; processing and properties J. Svoboda	76
A-81-1:	Nanoindentation measurements on deformation-induced α' -martensite in a metastable austenitic high-alloy CrMnNi steel A. Weidner, U. Hangen, H. Biermann	77
A-81-2:	The Portevin-Le-Châtelier effect in a metastable austenitic stainless steel A. Weidner, C. Segel, M. Linderov, A. Vinogradov, H. Biermann	78
A-84-1:	Effect of welding parameters on the strength of friction stir spot welded aluminum joints B. Beidokhti, P. Bashi Shahabi, A. Naderi Fard	79
A-86-1:	Strength of defect-free crystals: scale and dimensionality effects S. Kotrechko, A. Timoshevskij, I. Mikhailovskij, E. Kolivoshko	80
A-87-1:	Slip systems slip-modes and dislocation densities in individual grains of bulk polycrystalline materials from a novel 3D synchrotron radiation T. Ungár, G. Ribárik	81
A-87-2:	Dislocation structure correlated to strength by neutron diffraction line broadening T. Ungár, X. Wang	82
A-87-3:	The role of dislocations for the strength of submicron grain-size materials T. Ungár, E. Schafler, B. Joni, M. Zehetbauer	83
A-88-1:	High temperature and low stress $\{011\}\langle 01\bar{1}\rangle$ shear creep deformation of the single crystal Ni-based superalloy LEK 94 - elementary softening and deformation processes L. Agudo Jácome, G. Göbenli, G. F. Eggeler	84
A-92-1:	Creep and microstructure in directionally solidified NiAl(Cr)-Mo alloys M. Dudová, H. Bei, C. Somsen, E. P. George, A. Dlouhý	85
A-93-1:	Observations of deformation mechanisms and crack propagation in Ni-based alloys in-situ in a transmission electron microscope D. Kaoumi, T. Gautier	86
A-93-2:	Deformation-induced phase transformation in 304 stainless steel D. Kaoumi	87
A-99-1:	Temperature-induced rearrangement of fatigue dislocation structure in Al single crystals C. Watanabe, Y. Wakamatsu, R. Monzen	88

Table of contents

A-100-1:	Thermo-mechanical fatigue behaviours of NiTi shape memory alloy under cyclic phase transformation Y. He, L. Zheng, H. Yin, Z. Moumni	89
A-101-1:	Micro-scale fracture behavior of metallic glass thin films B. N. Jaya, M. Koehler, V. Schnabel, D. Raabe, J. M. Schneider, C. Kichlechner, G. Dehm	90
A-102-1:	Superplastic properties of ultrafine-grained AZ31 after EX-ECAP J. Stráská, H. Nováková, J. Stráský, M. Janeček	91
A-104-1:	Anisotropy and asymmetry of the yield stress of a FCC twin/matrix lamellae structure tested by tension and compression S. Kopacz, M. Szczerba	92
A-105-1:	Influence of segregation on cohesion of grain boundaries in molybdenum: An ab-initio study D. Scheiber, R. Pippan, P. Puschnig, L. Romaner	93
A-106-1:	Experimental evidence of the quasi-reverse FCC twinning M. J. Szczerba, S. Kopacz, M. Szczerba	94
A-107-1:	Thermo-mechanical fatigue and microstructural analysis of laser welded IN 738 superalloy J. O. Aina, O. A. Ojo, M. C. Chaturvedi	95
A-110-1:	Creep behavior on type 310 stainless steel. Part 1: Parameters from the Norton, Arrhenius and Monkman-Grant relations L. O. Bueno, A. Contin Jr.	96
A-110-2:	Creep behavior on type 310 stainless steel. Part 2: Analysis based on the study of transients after stress reduction experiment L. O. Bueno, A. Contin Jr.	97
A-110-3:	Creep behavior on type 310 stainless steel. Part 3: Correlations of the stress exponent and activation energy values with the d L. O. Bueno, J. Campanelli	98
A-111-1:	Atomistic simulation of the irreversibility of surface cyclic slip in fcc metals Z. Fan, O. Hardouin Duparc, M. Sauzay	99
A-112-1:	Experimental investigation and modelling of elastic-plastic deformation and fcc-bcc phase transformation in metastable austenitic steel AISI 347 R. Skorupski, R. Schmitt, M. Smaga, R. Müller, D. Eifler, T. Beck	100
A-114-1:	Microstructure, deformation and mechanical behaviour of cryogenic deformed CuAgZr conductor materials J. Freudenberger, F. Thiel, A. Kauffmann, D. Rafaja, L. Schultz	101
A-115-1:	Unexpected grain size reduction by heating in nanocrystalline FeAl C. Gammer, C. Rentenberger, H. P. Karnthaler	102
A-115-2:	Dislocation reactions in brittle NiAl plastically deformed at RT D. Geist, C. Gammer, C. Rentenberger, H. P. Karnthaler	103
A-118-1:	Role of effective dislocation density in strength of low carbon martensitic steel D. Akama, S. Kobayasi, N. Nakada, T. Tsuchiyama, S. Takaki	104
A-120-1:	Influence of local residual stresses due to prestrains or overloads on the on the fatigue crack propagation in high strength steels M. Thielen, M. Marx, M. Sheikh Amiri, C. Motz, C. Boller	105
A-121-1:	Yield drop phenomena in alumina single crystals deformed for basal slip A. Nakamura, E. Tochigi, N. Shibata, K. Toyoura, K. Matsunaga, P. Lagerlöf, Y. Ikuhara	106
A-122-1:	Development of an architected micro-composite duplex stainless steel: Experimental exploration and simulation H. Naser, A. Deschamps, M. Veron, M. Mantel, M. Mantel, G. Parry, N. Meyer	107

A-123-1:	Effect of low temperature aging on Hall-Petch relationship in interstitially-alloyed ferritic steel T. Tsuchiyama, K. Fujii, S. Araki, S. Takaki, J. Takahashi, K. Ushioda	108
A-124-1:	Bicrystal study on atomic structures and electric properties of low-angle tilt grain boundaries in lithium niobate Y. Furushima, A. Nakamura, K. Toyoura, K. Matsunaga	109
A-126-1:	Microstructure and microdeformation during tensile testing of Ti-6Al-4V fabricated by selective laser melting R. Konečná, G. Nicoletto, A. Baca, L. Kunz	110
A-127-1:	Slip system activity in crystal plasticity M. Orthaber, T. Antretter	111
A-128-1:	Formation of nanocrystals in a ZrCuAlAg bulk metallic glass under dynamic loading conditions C. Gammer, D. Beitelschmidt, C. Ebner, H. P. Karnthaler, S. Pauly, J. Eckert, C. Rentenberger	112
A-128-2:	Improvement of the tensile properties of a bulk metallic glass by severe plastic deformation S. Noisternig, C. Gammer, D. Beitelschmidt, C. Ebner, H. P. Karnthaler, S. Pauly, J. Eckert, C. Rentenberger	113
A-130-1:	Mesoscale modelling of the tensile response of bcc crystals in the athermal regime R. Madec, L. Kubin	114
A-132-1:	Observation of a new dynamic recovery mechanism during high strain deformation T. Yu, N. Hansen, X. Huang, A. Godfrey	115
A-133-1:	Atomic level reasons for anomalous slip in BCC transition metals Y. Lin, V. Vitek	116
A-136-1:	Effect of carbon content on auto-tempering behavior in plain carbon steels M. Murakami, K. Iwanaga, S. Mizoguchi, D. Akama, N. Nakada, T. Tsuchiyama, S. Takaki	117
A-139-1:	Role of twinning on Bauschinger effect in commercially pure titanium S. Sinha, N. P. Gurao	118
A-140-1:	Characterisation of the influence of material hardness in precise electrochemical machining of steel G. Meichsner, M. Hackert-Oschätzchen, M. Krönert, J. Edelmann, A. Schubert, G. Hahn, M. Putz	119
A-142-1:	Deformability of metals and autowave mechanism of plastic flow L. B. Zuev	120
A-143-1:	Effect of the duplex microstructure of stainless steels on plastic strain and induced martensitic transformation A. Lechartier, N. Meyer, A. Dechamps, M. Veron, R. Estevez, G. Parry, M. Mantel	121
A-144-1:	Effect of planar anisotropy on cyclic behaviour of stainless steel P. S. Priyadarshi, N. P. Gurao	122
A-145-1:	Toughening due to shear kinking in composites H. Tankasala, N. Fleck, V. Deshpande	123
A-146-1:	Deformation induced formation of nanocrystals in amorphous Co ₃ Ti C. Ebner, S. Noisternig, C. Gammer, C. Rentenberger, C. Gspan, F. Hofer, H. P. Karnthaler	124
A-146-2:	Nanocrystalline B2 CoZr alloys processed by high pressure torsion C. Ebner, M. Matsuda, A. Panigrahi, M. Kerber, C. Rentenberger, T. Waitz	125
A-148-1:	Cyclic deformation behavior and dislocation structures of thin copper foils R. Saito, R. Hirai, K. Kammuri, T. Fujii	126

Table of contents

A-150-3:	The variation of alpha in the Taylor relation with dislocation density/arrangement: examples of monotonic and cyclic deformation H. Mughrabi	127
A-151-1:	Strain hardening mechanism of metastable austenite: α' -martensite formation within shear bands S. Martin, S. Wolf, U. Martin, L. Krüger, D. Rafaja	128
A-154-1:	A systematic study on the influence of Ni on γ' strengthened Co-Base superalloys C. H. Zenk, S. Neumeier, M. Göken	129
A-157-1:	Strain localization during tensile test of IF steel with various grain sizes S. Gao, M. Chen, A. Shibata, N. Kamikawa, N. Tsuji	130
A-158-1:	Mechanical behavior and microstructural evolution of CP titanium and Ti-6Al-4V alloy under biaxial tension N. Srinivasan, R. Velmurugan, R. Kumar, S. K. Singh, B. Pant	131
A-159-1:	First principle study of the spin polarization effects on the structural and elastic properties of iron nitride Fe_4N H. Maiz Hadj Ahmed, A. Gueddouh, B. Bentría, M. Ferhat	132
A-160-1:	Fabrication and characterization of thin ceramic layers by sol-gel E. El Moussafir	133
A-161-2:	In situ TEM compression and tension of a bulk metallic glass C. Gammer, C. Rentenberger, H. P. Karnthaler, C. Czarnik, D. Beitzschmidt, S. Pauly, J. Eckert, A. M. Minor	134
A-162-1:	High temperature deformation behaviour of Mg-Ca-Sn-Al magnesium alloy N. Koundinya, K. R. Ravi, R. S. Kottada	135
A-163-1:	Effect of dislocation density on the solid solution strengthening by Cr in steel K. Morita, D. Akama, N. Nakada, T. Tsuchiyama, S. Takaki	136
A-169-1:	Influence of particles on work hardening strain and recovery strain W. Blum, J. Dvořák, P. Král, V. Sklenička	137
A-171-1:	Plastic flow mechanisms in microcast aluminium wires S. Verheyden, J. Krebs, A. Mortensen	138
A-175-1:	Dislocation motion and related nano-mechanical behavior in bcc iron T. Ohmura, L. Zhang, T. Suzuki, N. Sekido	139
A-177-1:	Low cycle fatigue behavior of a 10%Cr martensitic steel at elevated temperature R. V. Mishnev, N. R. Dudova, R. O. Kaibyshev	140
A-179-1:	Determination of the properties of a porous aluminium oxide film by means of indentation techniques L. M. Hemmouche, D. M. Chicot, A. M. Amrouche, M. M. Belouchrani	141
A-181-1:	Predicting fault energies in A_3B intermetallic compounds with L12 structure K. V. Vamsi, S. Karthikeyan	142
A-183-1:	From single crystal superalloy microstructural modelling to high resolution diffrac- tion peaks simulation A. Jacques, G. Ribárik	143
A-184-1:	Strain hardening in extruded pure magnesium at high strain rates B. Dash, P. Babu, S. Karthikeyan	144
A-186-1:	First principles tensile test of Ni grain-boundary with segregated sp-impurities M. Černý, P. Šesták, P. Řehák, M. Všianská, M. Šob	145
A-187-1:	Detwinning at early stages of mechanical training of a non-modulated Ni-Mn-Ga martensite M. J. Szczerba, R. Chulist, W. Maziarz, J. Wojewoda-Budka, S. Kopacz, M. S. Szczerba	146

A-189-1:	Improved fatigue properties of SAE 52100 using the TRIP-effect – evaluated with the short-time-procedures PHYBAL-CHT- and PHYBAL M. Klein, H. Kramer, D. Eifler	147
A-190-1:	The effect annealing on the formation of ultrafine grained structure in a cryo-rolled TWIP steel M. Klimova, S. Zherebtsov, G. A. Salishchev	148
A-192-1:	The role of a dispersion of M(C,N) carbonitrides in creep resistance of 9% Cr martensitic steel V. Dudko, A. Belyakov, R. O. Kaibyshev	149
A-193-1:	Near-threshold behavior of modes II and III fatigue cracks in niobium T. Vojtek, J. Pokluda, A. Hohenwarter, R. Pippan	150
A-194-1:	Textural features of cold-rolled Ti-31.7Nb-6.21Zr-1.4Fe-0.16O alloy V. Cojocar, D. Raducanu, D. Gordin, I. Cinca, I. Dan, L. Angelescu	151
A-195-1:	Characterization of the fatigue behaviour of an equine superficial digital flexor tendon C. Freitag, A. Ohrndorf, H. J. Christ	152
A-197-1:	Plasticity of the γ' rafts of a single crystal superalloy during high temperature creep tests with load or temperature jumps R. Trehorel, T. Schenk, A. Jacques, J. le Graverend, J. Cormier	153
A-198-1:	Mechanical properties enhancement of aluminium alloys by severe plastic deformation A. Boudiaf, S. Zeghdane, L. Hemmouche	154
A-202-1:	Influence of alloying additions on creep behaviour of Mg-Ca-Sn alloy N. Koundinya, K. R. Ravi, R. S. Kottada	155
A-202-2:	Compression creep behaviour of CoCrFeNi high entropy alloy synthesized by mechanical alloying and spark plasma sintering S. Praveen, B. S. Murty, R. S. Kottada	156
A-203-1:	Effect of a dispersion of secondary phase particles on mechanical properties of a martensitic steel N. R. Dudova, A. Fedoseeva, R. O. Kaibyshev	157
A-206-1:	Mesoscale mechanical modelling of pearlitic microstructures B. S. Anglin, A. D. Rollett, T. Sano, C. L. Randow, C. Yen	158
A-207-1:	Strengthening mechanism in as-quenched martensitic steels containing carbon S. Takaki, D. Akama, N. Nakada, T. Tsuchiyama, K. Morita	159
A-211-1:	γ' -phase creep deformation of a nickel-based single crystal superalloy during thermal jumps followed by X-ray diffraction J. le Graverend, A. Jacques, J. Cormier, T. Schenk, O. Ferry, J. Mendez	160
A-213-1:	In-situ synchrotron diffraction of thermal treatment of ultrafine-grained metals produced by severe plastic deformation E. Schafler, F. Spieckermann, R. Schuster, B. Joni, N. A. Schell	161
A-216-1:	In-situ investigation of the slip systems activity in Mg-Al alloys using neutron diffraction line profile analysis K. Máthis, J. Čapek, T. Krajňák, B. Clausen	162
A-218-1:	An atomistic study of the role of grain boundary character on grain boundary sliding S. Mridha, S. Karthikeyan	163
A-222-1:	Influence of fluxing with B ₂ O ₃ on the mechanical properties in platinum bulk metallic glasses H. Kazemi, L. Weber	164

Table of contents

A-223-1:	Orientation-dependent plastic deformation of spark plasma sintered Al-Zn-Mg-Cu alloy under tensile load H. Becker, M. Dopita, C. Ullrich, O. Molnar, D. Rafaja	165
A-224-1:	Deformation mechanism maps for tensile deformation of commercially pure titanium H. Becker, W. Pantleon	166
A-225-1:	Tensile properties and deformation structure in TRIP steels at low temperature T. Yamashita, N. Koga, S. Morooka, O. Umezawa	167
A-226-1:	Tensile strength of $\Sigma 5$ (210) grain boundary in cobalt with segregated sp-impurities P. Šesták, M. Černý, P. Řehák, M. Všianská, M. Šob	168
A-229-1:	Modeling of line profiles: a comparison of strain based and FFT methods G. Ribárik, A. Jacques	169
A-231-1:	MD simulations of deformation in FCC metals with different stacking fault energies P. Pant, P. Limaye, S. K. Singh, M. P. Gururajan	170
A-232-1:	Modelling of internal stresses generated by dislocation microstructures and comparison to experimental data M. Sauzay, L. Dupuy	171
A-234-1:	The effect of carbon fibre content on the physical and mechanical properties of an aluminium matrix composite X. Liu, P. Li, Z. Liu	172
A-235-1:	Assessment of the high temperature behavior of a new Fe18Cr NDS produced by mechanical alloying N. Herve, Y. De Carlan , C. Cayron, L. Briottet	173
A-236-1:	Small creep strains in Zr-1%Nb alloy L. Kloc, V. Sklenička, E. Evangelista	174
A-239-1:	Evolution of elastic moduli and thermal expansion coefficient as a function of temperature in a CoCrFeMnNi high-entropy alloy G. Laplanche, P. Gadaud, O. Horst, F. Otto, G. F. Eggeler, E. P. George	175
A-239-2:	Study of elementary deformation mechanisms in NiTi shape memory alloys G. Laplanche, G. F. Eggeler, J. Pfetzinger-Micklich	176
A-244-1:	Effect of hydrogen induced martensite ϵ -phase M. Tateya, N. Takano	177
A-245-1:	Plasticity in micrometer scale: weakest link statistics, stress fluctuations and the role of the specimen size Á. Hegyi, P. D. Ispánovity, I. Groma, G. Györgyi	178
A-247-1:	A local approach to fit three-parameter Weibull distribution functions for failure prediction M. Muniz-Calvente, A. Ramos, A. Fernández-Canteli, P. Fernández, M. J. Lamela	179
A-248-1:	Shape memory strain recovery in Cu-Al-Ni single crystals A. I. Averkin, P. N. Yakushev, S. A. Pulnev, R. B. Timashov, G. P. Zograf, V. I. Nikolaev	180
A-250-1:	Crack initiation during very high cycle fatigue of tempered steel U. Krupp, A. Giertler, P. Hilgendorff, M. C. Marinelli, K. Jahns	181
A-252-1:	Reactive stress generation in Ni-Fe-Ga single crystals at martensitic transformations V. I. Nikolaev, A. I. Averkin, V. M. Krymov, V. V. Fedorov, S. A. Pulnev, R. B. Timashov, A. I. Priadko	182
A-253-1:	Formation of peculiar chemical bonds across slip planes in ductile ionic crystals K. Matsunaga, N. Shimoda, K. Toyoura, A. Nakamura	183

A-255-1:	Dislocation structures in Sanicro 25 steel after low cycle fatigue at ambient and elevated temperatures M. Heczko, J. Polák, T. Kruml, R. Petráš	184
A-256-1:	The study of precipitation strengthening of Ni-based superalloy prepared by powder metallurgy N. Luptáková, P. Král, P. Dymáček	185
A-257-1:	Small punch test - the way how to obtain material mechanical properties from very small volumes P. Dymáček, F. Dobeš	186
A-258-1:	Peierls barriers of a-type screw dislocations in magnesium moving on basal and prismatic planes A. Ostapovets, O. Vatazhuk, R. Gröger	187
A-259-1:	On the behavior of oxide nanoparticles in ODS steel subjected to dynamic plastic deformation Z. Zhang, O. Mishin, N. Tao, W. Pantleon	188
A-260-1:	Creep studies in novel Co-Ti-V based alloys S. K. Verma, T. A. Abinandanan, S. Karthikeyan	189
A-263-1:	Three types of B2 alloys V. Paidar, M. Čák	190
A-264-2:	Study of strain induced martensitic transformation for 316L austenitic stainless steels by cold deformation T. A. El-Bitar, A. A. Hegazy, A. M. Almosilhy	191
A-265-1:	Influence of the constrained groove deformation on structure and properties of pure aluminium J. Zrník, M. Cieslar, P. Sláma	192
A-266-1:	Increasing the strength of nanocrystalline metals by annealing: Is segregation necessary? O. Renk, A. Hohenwarter, K. Eder, J. M. Cairney, R. Pippan	193

A-482-3:	A multiscale simulation framework of the accumulative roll bonding process accounting for texture evolution A. Prakash, W. Noehring, R. A. Lebensohn, H. W. Höppel, E. Bitzek	349
A-483-1:	Effect of high temperature and HIP on low cycle fatigue behaviour of MAR-M-247 I. Šulák, K. Obrtlík, K. Hrbáček, V. Škorík	350
A-484-1:	Analyses of SPD induced vacancy agglomerates and their effects to strength before and after aging D. Setman, P. Cengeri, J. Horky, I. Mulalic, E. Schafler, F. Spieckermann, B. Sulkowski, M. Zehetbauer	351

Table of contents

A-485-1:	Probing the strength and fracture toughness of hard second phases at the micron scale M. G. Mueller, V. Pejchal, L. Michelet, G. Zagar, A. Rossoll, M. Cantoni, A. Mortensen	352
A-486-1:	A study of short-term creep in titanium-nickel alloy V. F. Mozgunov, A. E. Volkov, E. V. Boltynyuk	353
A-487-1:	Microstructural dependence of the micro mechanical behavior of Inconel 718 J. N. Wagner, M. Hofmann, L. Karge, R. Gilles, C. Krempaszky	354
A-488-1:	Static softening of twin-roll cast aluminum strips prepared by constrained groove pressing M. Cieslar, J. Bajer, M. Poková, J. Zrník, M. V. Zimina	355
A-489-1:	High cycle fatigue damage mechanism of nickel based superalloys at elevated temperatures M. Šmíd, P. Hutař, L. Kunz, K. Hrbáček	356
A-491-1:	Mechanical properties and microstructure evolution in interstitial free steel processed by severe plastic deformation M. Janeček, T. Krajňák, J. Stráská, J. Čížek, J. Gubicza, H. Kim, J. Stráský	357
A-492-1:	Variable temperature time-dependent plasticity of nanocrystalline nickel thin films determined using microcompression J. Wehrs, G. Mohanty, J. M. Wheeler, B. Boyce, M. Hasegawa, L. Philippe, J. Michler	358
A-493-1:	Microstructure evolution of twin-roll casted AZ31 magnesium alloy after severe plastic deformation M. V. Zimina, J. Bohlen, D. Letzig, G. Kurz, M. Cieslar, P. Beran, M. Knappek	359
A-495-1:	Behaviour of self-affine microstructures during plastic deformation of metals A. Vinogradov, I. S. Yasnikov, Y. Estrin	360
A-496-1:	Theoretical study of interfaces between transition metals and a-C:H M. Mrovec, D. Di Stefano, C. Elsässer, S. Rajagopalan, P. A. Stevens	361
A-496-2:	Influence of hydrogen on grain boundary cohesion in nickel D. Di Stefano, M. Mrovec, C. Elsässer	362
A-497-1:	Influence of shot peening and specimen orientation on fatigue strength in extruded magnesium alloy AZ80 M. Nakatani, T. Ohtagaki, Y. Harada	363
A-498-1:	In situ TEM characterization of dynamic behavior of dislocations and grain boundaries in oxides Y. Ikuhara, S. Kondo, E. Tochigi, N. Shibata	364
A-499-1:	The effect of magnetism on ideal strength and structural stability in ferromagnetic metals M. Šob, M. Zelený	365
A-500-1:	Analysis of damage accumulation and damage behavior in a self-reinforced polypropylene (PURE) by using digital image correlation A. Brückner-Foit, C. Skotarek	366
A-500-2:	Investigation of the damage mechanisms during fatigue in pure iron A. Brückner-Foit, L. Zellmer, S. Tereschenko, P. Lehmann	367
A-502-1:	Influence of defects and its configuration on creep behaviors S. Tian	368
A-503-1:	First-principles study of the mechanical behavior of Nickel and Nickel-rich alloys subject to [001] loading A. Breidi, M. Palumbo, S. G. Fries, A. Ruban	369
A-504-1:	Modelling of precipitation in high strength creep resistant steels T. Antretter, F. D. Fischer, E. Kozeschnik, J. Svoboda	370

A-508-1:	Micro-cantilever testing of deformation twinning in titanium J. Gong, E. Tarleton, A. J. Wilkinson	371
A-509-1:	Interface induced electronic structure toughening of nitride superlattices D. Holec, P. Řehák	372
A-510-1:	Hydrogen trapping - its contribution toward a better understanding of hydrogen embrittlement mechanisms D. Eliezer	373
A-514-1:	Influence of deformation and heat treatment on the nanohardness distribution in a $Zr_{44}Ti_{11}Cu_{10}Ni_{10}Be_{25}$ bulk metallic glass M. Ezzeldien, Z. Kovács, C. Nguyen Quang, G. Radnóczy, J. Lendvai	374
A-514-2:	Statistical analysis of acoustic emission events in a Vitreloy bulk metallic glass subjected to torsional deformation Z. Kovács, M. Ezzeldien, K. Máthis, P. D. Ispánovity, F. Chmelík, J. Lendvai	375
A-515-1:	R-curve and fatigue behavior of damage-tolerant $Zr_{61}Ti_2Cu_{25}Al_{12}$ bulk metallic glass J. Xu, H. Qiang, S. Zhen-Qiang, M. Evan	376
A-516-1:	Recent advances on research of severe plastic deformation R. Z. Valiev	377
A-517-1:	Effect of cyclic pre-deformation on the uniaxial mechanical properties of copper single crystals with different orientations X. W. Li, X. M. Wang, W. W. Guo, C. J. Qi, Y. Yan	378
A-518-1:	Extraordinary plasticity of SiCp/Al in Ti-(SiCp/Al) laminated composites synthesized by roll bonding G. Fan, M. Huang, X. Y. Mao, T. T. Zhang, X. P. Cui, J. Deng, Y. Du, L. Geng	379
A-519-1:	Thresholds of fatigue crack growth in modes I, II and III: Crystallographic and dislocation background J. Pokluda	380
A-520-1:	Time-dependent mechanical behavior of nylon-clay hybrid nanocomposites S. Zhu, A. Usuki, M. Kato	381
A-523-1:	Hardening mechanism of commercially pure Mg processed by high pressure torsion at room temperature X. Qiao, Y. W. Zhao, W. M. Gan, Y. Chen, M. Y. Zheng, K. Wu, N. Gao, M. J. Starink	382
A-524-1:	$Co_{38}Ni_{33}Al_{29}$ and its martensitic transformations J. Kopeček, V. Kopecký, L. Klimša, K. Jurek, P. Sedlák, H. Seiner, M. Landa, O. Heczko	383
A-525-1:	Uncovering deformation mechanisms of ordered intermetallic phases in Ni-base superalloys D. Lv, D. McAllister, M. J. Mills, Y. Wang	384
A-527-1:	Uniaxial tensile behavior of pure Al and Cu-Al alloys subjected to low-cycle pre-deformation Y. Yan, M. Lu, W. W. Guo, X. W. Li	385
A-528-1:	Singular and non-singular stress terms for the failure assessment of bi-material notches O. Krepl, J. Klusák, T. Profant	386
A-530-1:	Characterizing novel deformation mechanisms in superalloys T. Smith, D. McAllister, B. Viswanathan, Y. Wang, M. J. Mills	387
A-531-1:	Microstructure and mechanical anisotropy of veined rapa whelk shell H. M. Ji, X. W. Li	388

Table of contents

A-533-1:	The thermal stability of Cr-Cu nanostructured materials revealed at the atomic resolution Z. Zhang, G. Dehm, R. Pippan	389
A-533-2:	Linking the elastic deformation of defects with the electronic structure changes using advanced TEM Z. Zhang, R. Daniel, C. Mitterer, G. Dehm	390
A-536-1:	Analysis of the mechanical anisotropy of tensile samples trough digital image correlation and finite element modelling M. A. Ramirez, A. Ortiz, J. Gawad, P. Eyckens, A. Van Bael, R. Schouwenaars	391
A-546-1:	Polymers at interfaces – properties at the nanoscale and their multiscale impact C. Brinson, X. Cheng, M. Zhang	392
A-549-1:	Microstructure and mechanical properties control for commercial aluminum alloys through SPD/ECAP processing N. Serban, D. Raducanu, V. Cojocaru	393
A-549-2:	Process parameters estimation using computer simulation for a commercial 6063-T1 aluminum alloy severely deformed by ECAP N. Serban, D. Raducanu, V. Cojocaru	394
A-550-1:	Theoretical background for diffraction of individual grains of polycrystal Á. Takács, T. Ungár, G. Tichy	395
A-552-1:	Investigation of a thin film indium solder for wafer bonding M. Wendt	396
A-555-1:	Production, characterization, and mechanical behavior of Al based metal matrix composites incorporating TiC particles B. Dikici, F. Bedir, M. Gavgali	397
A-558-1:	Effect of complex strain paths on microstructure evolution studied by in-situ neutron diffraction T. T. Trang, T. Panzner, S. Van Petegem, H. Van Swygenhoven	398
A-564-1:	The coupling of phase transformation and plasticity: Micropillar tests and phase field-finite element simulations H. Paranjape, S. Manchiraju, B. Bowers, M. J. Mills, Y. Wang, P. M. Anderson	399
A-569-1:	Grain size effects on the mechanical properties of extruded magnesium alloys K. U. Kainer, D. Letzig, J. Bohlen	400
A-591-1:	Microstructural investigations of a nanocrystalline CoCrFeMnNi high-entropy alloy B. Schuh, F. Mendez-Martin, B. Völker, E. P. George, E. P. George, H. Clemens, R. Pippan, A. Hohenwarter	401
A-593-1:	Neutron diffractometer for research on strength of materials at J-PARC S. Harjo, K. Aizawa, T. Kawasaki	402
A-669-1:	The ordering energy impact on the strain-induced order-disorder phase transition S. V. Starenchenko, V. A. Starenchenko, Y. V. Soloveva	403
A-669-2:	Creep curves of Ni ₃ Ge single crystals: Experiment and modeling V. A. Starenchenko, S. V. Starenchenko, Y. V. Soloveva, O. D. Pantyukhova	404
A-672-1:	Tension-compression response of a columnar $\langle 011 \rangle$ nano-grain bcc Fe polycrystal J. Gil Sevillano, I. Aldazabal, A. Luque, J. Aldazabal	405
A-680-1:	Detection of dynamic softening during hot deformation of medium Si-steels by a thermo-mechanical simulator (Gleeble 3500) T. A. El-Bitar, M. R. El-Meligy, E. H. El-Shenawy	406
A-694-1:	The role of bending vs. tension loading on the fracture toughness of metallic glasses B. Gludovatz, J. J. Kruzic, M. D. Demetriou, W. L. Johnson, R. O. Ritchie	407

A-694-2: Fracture and fatigue of fcc medium- and high-entropy alloys at ambient to cryogenic temperatures 408
B. Gludovatz, K. V. Thurston, A. Hohenwarter, D. Catoor, H. Bei, E. P. George, R. O. Ritchie
