

# CONTENTS

A. Boualleg, D. Cirkl: Experiment and finite element method validation of 3D printed flexible Voronoi structures .....	7
M. Byrtus, R. Bulín, J. Rendl, M. Hajžman, Š. Dyk: Minimal models for friction-induced vibrations .....	11
D. Cirkl, T. Hruš, A. Boualleg, D. Stavnichuk: A preliminary study on geometric design of 3D Voronoi structures .....	17
S. Krupnik, M. S. Kozień: Changes of values of dynamic parameters of an arrowhead-type metamaterial structures for their different geometries .....	19
M. Mračko, V. Bula, D. Hlaváček, J. Masák, D. Gabriel, I. Zolotarev, J. Souček, R. Lán: Dynamic analysis of the mechanism control unit for the Lisa mission .....	25
L. Pešek, C. S. Prasad, P. Šnábl: Contribution to influence of stribek's velocity magnitude on the instability of oscillation during braking of a flexible subsystem .....	29
C. S. Prasad, P. Procházka, L. Pešek: Numerical and experimental evaluation of aerodynamic forces on 3D blade Cascade under 3D flow field .....	37
P. Procházka, P. Šnábl, V. Skála: On the calibration of the bypass tunnel used for blade cascade aeroelastic study .....	43
P. Šnábl, L. Pešek: Rate-dependent tangential contact behavior of PVD-coated surfaces under harmonic loading .....	47
E. Voronova, P. Procházka, M.L. Mekhalfia, D. Maturkanič, R. Hodbod': Experimental investigation of magnets properties – part 2 .....	51
J. Warminski, L. Kloda, D. Melnyk, A. Mitura: Nonlinear design of multi-stable composite shells for energy harvesting .....	55
J. Zapoměl, J. Kozánek, P. Šulc: Research of rotors mounted in permanent magnetic bearings .....	61
Author index .....	63
