

Contents

1 Geometric structures	7
1.1 P_0 -structures	7
1.2 Cartan geometries	11
1.3 (Locally) homogeneous Cartan geometries and extensions	14
1.4 Examples of extensions	17
1.5 Affine geometries and first order P_0 -structures	19
2 Symmetries of geometric structures and symmetric spaces	21
2.1 Symmetries and local symmetries	21
2.2 Affine locally symmetric spaces	26
2.3 Homogeneous symmetric spaces and classification of symmetric spaces	27
2.4 Local structure of symmetric P_0 -structures	29
2.5 Symmetric P_0 -structures on symmetric spaces	32
2.6 Examples of invariant P_0 -structures on locally symmetric spaces	33
3 Parabolic geometries and symmetries	38
3.1 Parabolic geometries and gradings	38
3.2 Regular infinitesimal flag structures	40
3.3 Normal parabolic geometries	41
3.4 Symmetries of parabolic geometries	42
4 Symmetric parabolic geometries I. – AHS-structures	46
4.1 One graded parabolic geometries and symmetries	46
4.2 Projective structures	49
4.3 Conformal structures	51
4.4 Quaternionic structures	52
4.5 Para-quaternionic structures	53
5 Symmetric parabolic geometries II. – Parabolic contact geometries	55
5.1 Parabolic contact geometries and symmetries	55

5.2	Extensions to parabolic contact structures of dimension 3	59
5.3	Extensions to Lagrangean contact structures	64
5.4	Extensions to CR structures	71
5.5	Extension to contact projective structures	77
5.6	Remarks on geometric interpretation	82
A	Tables of simple symmetric spaces	84
B	Tables of gradings	88
