

TABLE OF CONTENTS

	Page
Preface	5
<i>Zdeněk Tůma</i>	
1. Historical Perspective on the Development of the Forecasting and Policy Analysis System	7
<i>Aleš Čapek, Tibor Hlédik, Viktor Kotlán, Stanislav Polák and</i>	
Introduction	8
A Brief History of Monetary Policy in the Czech Republic	9
New Requirements of the Forecasting and Analytical System	13
2. Developing Consistent Scenarios with the Forecasting and Policy Analysis System	27
<i>Aleš Čapek, Tibor Hlédik, Viktor Kotlán and David Vávra</i>	
Introduction	28
Starting Conditions	28
Implementing the New FPAS: Principles and Objectives	30
Implementing the New FPAS: Process of Creating the Integrated Forecasts	33
Applying Judgement in the Forecast	39
Lessons Learned	40
Appendix: An Example of Forecast Report	44
3. Models Used in the Forecasting and Policy Analysis System	51
<i>Stanislav Polák and David Vávra</i>	
Introduction	52
Appendix: Other Models Used at the Czech National Bank	57
4. The Quarterly Projection Model and its Properties	63
<i>Jaromír Beneš, Tibor Hlédik, David Vávra and Jan Vlček</i>	
Introduction	64
Why Start with a Small Model?	64
The Essential Issues for the Model	67
Key Equations in the Quarterly Projection Model	69
Calibration of the Model	76
Estimation Versus Calibration	76
Calibration of the Core QPM	77
Properties of the QPM	81
5. A Multivariate Filter for Measuring Potential Output and the NAIRU	99
<i>Jaromír Beneš and Papa N'Diaye</i>	
Introduction	100
The Multivariate System	102
A Methodology for Pre-Filtering: The PC Filter	104
Estimates of Real Monetary Conditions	105

Estimates of Output and Unemployment Gaps	113
Comparison with Gaps Derived from the HP Filter	113
Appendix: The Multivariate Kalman Filter	114
6. Risk Analysis and Confidence Bands for the Forecast	119
<i>Jaromír Beneš, David Vávra and Jan Vlček</i>	
Introduction	120
Assessment of Risks	120
Understanding the Policy Implications of Uncertainty	121
An Overview of Stochastic Simulation and the Creation of Confidence Bands	122
Choosing the Shocks	123
Examples of Confidence Bands	124
Conclusion	126
Appendix: The Stochastic Simulation Framework for Computing Confidence Intervals	126
Bibliography	133
