PREFACE TO THE THIRD EDITION	v
PREFACE TO THE FIRST EDITION	vii

PART I. INTRODUCTION

CHAPTER

I. SCOPE OF THE REFRACTORIES INDUSTRY IN THE UNITED STATES	3
The Refractories Industry—Refractories in Relation to Other Industries—Recent Developments in the Industry—Future Trends in the Industry.	
II. LITERATURE ON REFRACTORIES	10
Books—Periodicals and Other Publications—Bibliographies—Abstracts.	
III. HISTORY OF REFRACTORY DEVELOPMENT IN THE UNITED STATES	15
Furnace Stone—Glass Pots and Crucibles—Lime—Fireclay Bricks—Silica Refractories—Chrome Refractories—Magnesite Refractories—High-alumina Refractories—Bibliography.	

PART II. MANUFACTURE

IV. REFRACTORY RAW MATERIALS	27
Clays—Clays and Minerals High in Alumina—Silica Minerals—Magnesite and Lime—Chromite—Less Common Refractory Oxides—Carbon—Production and Price of Minerals in the Refractories Industry—Summary—Bibliography.	
V. THE MINING AND PRELIMINARY TREATMENT OF REFRACTORY MATERIALS	76
Mining of Clays—The Mining of Ganister—Crushing and Grinding—Screening—Mineral-dressing Methods—Storage of Clay—Bibliography.	
VI. MOLDING METHODS	94
Workability of Clay—The Casting Process—The Soft-mud Process—The Stiff-mud Process—The Dry-press Process—Hydrostatic Molding of Refractory Powders—Molding of Insulating Firebrick—Abrasion-resisting Metals—Grog Sizing—Chemical Bonding—Hot Molding—Bibliography.	
VII. DRYING	157
The Mechanism of Drying—Drying Shrinkage—Dry Strength—Factors Influencing Drying Efficiency—Drier Calculations—Types of Driers—Bibliography.	
VIII. THE FIRING OF CLAY AND OTHER REFRACTORY MATERIALS	175
Effect of Heat on Raw Clay—Firing Properties of Nonclay Refractory Materials—Solid Reactions—Hot Pressing—Firing Properties of Re-	

CHAPTER

- fractory Bodies—Melted and Cast Refractories—Specific Heat—Heat Quantity Required to Raise the Temperature of Clays and Ceramic Bodies—Bibliography.
- IX. KILNS FOR BURNING REFRACTORIES 227
Introduction—General Principles—Periodic Kilns—Continuous Compartment Kilns—Tunnel Kilns—Shaft Kilns—Rotary Kilns—Air Preheaters—Handling and Storage—Bibliography.
- X. LABORATORY KILNS AND FURNACES 259
Combustion Furnaces—Electric Resistance Furnaces—Arc Furnaces—Solar Furnaces—High-frequency Induction Heating—Bibliography.
- XI. REFRACTORY MORTARS, PLASTICS, CONCRETES, AND COATINGS 290
Introduction — Mortars — Plastics — Concretes — Coatings — Bibliography.
- XII. SOME SPECIAL REFRACTORY MATERIALS 302
Introduction—Refractory Metals—Refractory Oxides—Refractory Porcelains—Carbides—Nitrides—Sulfides—Borides—Refractory Selenides, Silicides, and Phosphides—Refractory Single Crystals—Heterogeneous Refractory Systems—Refractory Glasses—Bibliography.
- PART III. PROPERTIES
- XIII. THE FUSION POINT OF REFRACTORY MATERIALS AND THEIR EQUILIBRIUM DIAGRAMS 347
Fusion Process—Method of Obtaining Fusion Points—Fusion Point and Composition—Melting Point of Some Refractory Materials—Value of Fusion Points—Equilibrium Diagrams—Bibliography.
- XIV. LOAD BEARING CAPACITY OF REFRACTORIES 401
The Mechanism of Load Failure—Method of Measurement—Load Values for a Number of Refractories—Factors Influencing the Load-bearing Capacity of Refractories—Application of Load-test Results to Design—Bibliography.
- XV. SPALLING 420
Introduction—Temperature Stresses in Solids—Study of Cracks Developed in Spalling—Theory of Spalling Due to Shear Stresses—Theory of Spalling Due to Tensile Stresses—Experimental Confirmation of Theory—Laboratory Spalling Test—Spalling Characteristics of Various Bricks—Effect of the Brick Structure on Spalling—Spalling Fracture in Service—Bibliography.
- XVI. THE REACTION BETWEEN REFRACTORIES AND SLAGS OR GLASSES 453
Chemical Effect of Slag Action—Physical Effects of Slag Action—Laboratory Slag Tests—The Slag Resistance of Refractories—The Products Formed in Slag Reactions—Gases and Refractories—Reaction between Different Refractories in Contact—Slag Erosion in Service—Bibliography.

CHAPTER

- XVII. EXPANSION AND SHRINKAGE 479
 Methods of Measurement—Expansion Characteristics of a Number of Refractory Bricks—Expansion of Silica Minerals—Expansion of Other Refractory Materials—Reheat Shrinkage of Refractories—Bibliography.
- XVIII. HEAT TRANSMISSION BY REFRACTORIES* 498
 Introduction—Laws of Heat Conduction—Theory of Heat Transfer through a Porous Body—Measurement of Thermal Conductivity—Thermal-conductivity Values for Refractories and Insulators—Flow of Heat through Walls under Steady Conditions—Computation of Heat Flow in Cylinders—Flow of Heat through Furnace Walls under Variable Conditions—Bibliography.
- XIX. SIZES AND TOLERANCES 523
 Standard Shapes—Special Shapes—Kiln Furniture—Muffles—Retorts—Crucibles—Glass Pots—Refractory Porcelain—Bibliography.
- XX. MISCELLANEOUS PROPERTIES OF REFRACTORIES 537
 Measurement of Particle Size—Structure—Permeability—Strength of Refractories—True Density—Abrasion Resistance—Electrical Resistivity—Bibliography.
- PART IV. USE
- XXI. REFRACTORIES IN THE IRON AND STEEL INDUSTRY 563
 Introduction—Blast Furnace—Cupola—Open-hearth Furnace—Pouring-pit Refractories—Air Furnace—Bessemer Converter—Electric-arc Furnaces—High-frequency Induction Melting Furnaces—Furnaces for Forming Operations—Heat-treating and Stress-relieving Furnaces—Bright Annealing Furnaces—Bibliography.
- XXII. REFRACTORIES IN THE NONFERROUS-METAL INDUSTRY 598
 Copper Production—Melting Copper Alloys—Zinc—Lead—Tin—Aluminum—Nickel—Bibliography.
- XXIII. REFRACTORIES IN THE GENERATION OF STEAM POWER 617
 Development of Boiler Furnace Design—Modern Furnaces and Boiler Walls—Slag-tap Furnace Floors—Boiler Baffles—Boiler Unit for Multi-fuel Firing—Pulverized Coal-fired Boiler—Cyclone Furnace—Spreader-stoker-fired Boiler—Oil-fired Marine Boiler—Waste-heat Boilers—Black-liquor Recovery Furnaces—Bibliography.
- XXIV. REFRACTORIES FOR USE IN NUCLEAR POWER PRODUCTION 631
 Introduction—The Nuclear Fission Process—Nuclear Fuel—Design of Power Piles or Reactors—Survey of Refractories for Potential Use in Power Reactor Development—Summary and Conclusions—Bibliography.
- XXV. REFRACTORIES FOR GAS-TURBINE AND JET-PROPULSION ENGINES 654
 Introduction—Types of Power Plants—Combustion Chambers—Nozzles—Guide Vanes and Reactors—Turbine Buckets—Turbine

CHAPTER

	Nozzle Blades—Turbine Rotors—Insulation—External Portions of the Rocket—Summary—Bibliography.	
XXVI.	USE OF REFRACTORIES IN MISCELLANEOUS INDUSTRIES	667
	Kilns—Glass Refractories—Refractories in the Cement and Lime Industry—Gas Production—Incinerators—Domestic Heating—Papermill Refractories—Enameling—Bibliography.	
XXVII.	BRICKWORK CONSTRUCTION	684
	Foundations—Floors and Hearths—Walls—Doors, Ports, and Flues—Sprung Arches—Domes—Suspended Arches—Brick Laying—Bibliography.	
APPENDIX		
	REFERENCE TABLES	737
	Table 156, Temperature-conversion Table—Table 157, Temperature Equivalents of Orton Pyrometric Cones—Table 158, Standard Calibration Data for Chromel-alumel Couples—Table 159, Standard Calibration Data for Chromel-alumel Couples—Table 160, Standard Calibration Data for Thermocouples from Platinum and Platinum Alloyed with 10 Per Cent Rhodium—Table 161, Standard Calibration Data for Thermocouples from Platinum and Platinum Alloyed with 10 Per Cent Rhodium—Table 162, Standard Calibration Data for Copper-constantan Thermocouple—Table 163, Standard Calibration Data for Copper-constantan Thermocouple—Table 164, Formulas Useful in Calculations.	
INDEX		749
