|--------------------------------|-------------|
| <i>Preface</i> | <i>ix</i> |
| <i>Acknowledgments</i> | <i>xi</i> |
| <i>About the authors</i> | <i>xiii</i> |

PART I PLANT EVOLUTION

| | |
|---|----------|
| 1. ORIGINS | 3 |
| 1.1 Earth, cells, and photosynthesis..... | 4 |
| 1.2 Eukaryotic cells..... | 5 |
| 1.3 Land plants | 9 |
| 1.4 Seed plants..... | 20 |
| 1.5 Angiosperms..... | 22 |
| Summary..... | 34 |

PART II GENOME CONTENT, ORGANIZATION, AND EXPRESSION

| | |
|---|-----------|
| 2. GENOMES | 37 |
| 2.1 The nuclear genome is organized in chromosomes..... | 38 |
| 2.2 Features of chromosomal DNA..... | 40 |
| 2.3 Genome sequences | 49 |
| 2.4 Genome evolution | 52 |
| 2.5 Organellar genomes..... | 59 |
| Summary..... | 65 |
| 3. GENE REGULATION | 67 |
| 3.1 Transcriptional regulation..... | 67 |
| 3.2 Regulation by chromatin modification..... | 70 |
| 3.3 Control of RNA processing and function..... | 76 |
| 3.4 Organellar gene regulation..... | 81 |
| Summary..... | 86 |

PART III METABOLISM

| | |
|---|------------|
| 4. PHOTOSYNTHESIS | 91 |
| 4.1 Overview of photosynthesis | 92 |
| 4.2 Light capture and the generation of NADPH and ATP | 96 |
| 4.3 Sucrose and starch synthesis | 106 |
| 4.4 Photorespiration | 116 |
| 4.5 C ₄ photosynthesis and other CO ₂ -concentrating mechanisms | 121 |
| Summary | 129 |
| 5. PRIMARY CARBON METABOLISM | 131 |
| 5.1 Movement of sugars in the plant ... | 131 |
| 5.2 Generation of energy and precursors..... | 137 |
| 5.3 Storage and mobilization | 150 |
| Summary | 162 |
| 6. BIOSYNTHESIS | 165 |
| 6.1 Fatty acids and lipids..... | 166 |
| 6.2 Amino acids, nucleic acids, and proteins..... | 172 |
| 6.3 Cell walls | 188 |
| 6.4 Terpenes and tetrapyrroles | 193 |
| 6.5 Phenolic compounds..... | 202 |
| Summary | 205 |
| 7. WATER AND NUTRIENTS | 207 |
| 7.1 Movement of water in plants..... | 208 |
| 7.2 Water deficit..... | 213 |
| 7.3 Nutrient requirements | 217 |
| 7.4 Nitrogen..... | 220 |
| 7.5 Phosphorus, sulfur, and iron | 225 |
| Summary | 232 |

PART IV GROWTH AND DEVELOPMENT

| | |
|--|------------|
| 8. CELLULAR BASIS OF PLANT GROWTH ... | 237 |
| 8.1 Cell growth | 238 |
| 8.2 The cell cycle | 253 |
| 8.3 The end of tissue growth | 275 |
| Summary | 280 |
| 9. PLANT HORMONES | 283 |
| 9.1 Signaling molecules in plant biology | 283 |
| 9.2 Hormones regulate plant growth and development | 284 |
| 9.3 Hormones and responses to environmental cues | 302 |
| Summary | 310 |
| 10. VEGETATIVE DEVELOPMENT | 313 |
| 10.1 Overview of plant development | 313 |
| 10.2 Embryo development | 316 |
| 10.3 Root development | 318 |
| 10.4 Shoot development | 323 |
| 10.5 Branch and stem development | 339 |
| Summary | 344 |
| 11. REPRODUCTIVE GROWTH..... | 345 |
| 11.1 From vegetative to reproductive development..... | 345 |
| 11.2 Development of reproductive organs | 354 |
| 11.3 From sporophyte to gametophyte .. | 359 |
| Summary | 370 |

PART V INTERACTIONS WITH THE ENVIRONMENT

| | |
|--|------------|
| 12. ENVIRONMENTAL SIGNALS | 373 |
| 12.1 Light and photoreceptors..... | 374 |
| 12.2 Circadian rhythms..... | 386 |
| 12.3 Flowering..... | 390 |
| Summary | 405 |
| 13. EXTREME ENVIRONMENTS..... | 407 |
| 13.1 Flooding | 409 |
| 13.2 Extreme drought..... | 417 |

| | |
|------------------------------------|-----|
| 13.3 Freezing temperatures..... | 421 |
| 13.4 Extreme heat..... | 424 |
| 13.5 Extreme soil conditions | 425 |
| Summary | 433 |

14. HOW PESTS AND PATHOGENS CAUSE PLANT DISEASE 435

| | |
|--|-----|
| 14.1 Pests and pathogens: An overview | 435 |
| 14.2 Microbial pathogens | 438 |
| 14.3 Pests and parasites | 450 |
| 14.4 Viruses and viroids..... | 453 |
| Summary | 455 |

15. PLANT DEFENSES 457

| | |
|---|-----|
| 15.1 Physical and chemical defense mechanisms | 458 |
| 15.2 Induction of defense responses: An overview | 464 |
| 15.3 Pattern-triggered immunity (PTI) .. | 465 |
| 15.4 Effector-triggered immunity (ETI) .. | 469 |
| 15.5 Local and systemic defense responses | 477 |
| Summary | 485 |

16. BENEFICIAL INTERACTIONS 487

| | |
|--|-----|
| 16.1 Plant pollinators | 487 |
| 16.2 Nitrogen-fixing symbioses | 490 |
| 16.3 Symbioses with mycorrhizal fungi | 501 |
| 16.4 Microorganisms associated with roots and leaves | 505 |
| Summary | 507 |

PART VI THE DEVELOPMENT OF AGRICULTURE**17. THE DOMESTICATION OF CROP PLANTS 511**

| | |
|---|-----|
| 17.1 The origins and history of domestication..... | 511 |
| 17.2 The discovery of domestication genes | 517 |
| 17.3 Domestication genes are often master regulators..... | 522 |
| Summary | 523 |

18. PLANT BREEDING AND CROP IMPROVEMENT 525

- 18.1 The diversification of crops following initial domestication..... 525
- 18.2 The origins of plant breeding 527
- 18.3 Genetic principles are fundamental to plant breeding..... 530

- 18.4 Advances in cellular and molecular biology are enhancing modern plant breeding 541
- Summary 551

Index.....553
