	PAGE
PREFACES	v

SECTION I.—THE CHEMICAL NATURE OF FATS.

CHAP.		
I.	Introductory: the natural processes concerned in the production of fats	1
II.	The properties and structure of the fatty acids in natural fats and waxes	6
III.	The more notable alcoholic constituents of natural fats and waxes	26
IV.	Methods of analysis and identification employed for fats and waxes	36
V.	The resolution of fats and waxes into their component alcohols and acids	87
	Sectional Bibliography	103

SECTION II.—THE COMPOSITION OF FATS OCCURRING IN NATURE.

I.	General distribution and output in nature of the fats and waxes	108
II.	Some of the more commonly occurring and technically useful fats and waxes	116
III.	The chemical composition of the more important classes of fats	169
IV.	Attempts to prepare synthetic fatty acids and fats	190
	Sectional Bibliography	199

SECTION III.—THE TRANSFORMATION OF FATS FOR INDUSTRIAL USE.

	Introduction	207
I.	The extraction of fats	209
II.	The refining of fats	236
III.	Fat-hydrogenation	262
IV.	Fat-splitting or hydrolysis	289
V.	Technical treatment of fatty oils or of fatty acids by solvents	305
	Sectional Bibliography	313

SECTION IV.—THE EDIBLE FAT INDUSTRY.

CHAP.	PAGE
Introduction	317
I. Butter	320
II. Margarine (butter substitutes)	328
III. The vegetable or nut butters	341
IV. Confectionery fats	344
V. Lard and lard substitutes	347
VI. The nutritional values of the various types of edible fats	352
VII. The problem of rancidity in edible fats	358
Sectional Bibliography	372

SECTION V.—THE SOAP INDUSTRY.

Introduction	376
I. The manufacture of genuine soap in the pan, coolers and driers	379
II. The physical chemistry of soaps	388
III. The production of toilet and shaving soaps	410
IV. The production of household soaps	420
V. The production of dry soap and soap powders	428
VI. Soft soaps and textile soaps	433
VII. " Sulphonated oils " (" Turkey red oil "), alkyl sulphates or sulphonates, and other materials now employed as a synthetic detergent "	438
Sectional Bibliography	458

SECTION VI.—THE USE OF FATS IN
CANDLES AND ILLUMINANTS.

Introduction	461
I. The manufacture of candles from fatty material	463
II. Fatty oils as illuminants	473
Sectional Bibliography	475

SECTION VII.—THE PRODUCTION OF
GLYCERINE FROM FATS.

Introduction	476
I. Crude glycerine	478
II. Dynamite glycerine	490
III. Pure glycerine	500
IV. The manufacture of glycerine from non-fatty materials	505
Sectional Bibliography	511

CONTENTS

xi

SECTION VIII.—THE USE OF FATS AND WAXES IN PAINTS, VARNISHES, AND OTHER SURFACE COVERINGS.

CHAP.	PAGE
Introduction	513
I. The "drying" and polymerization of fatty oils	516
II. The technical processes employed in preparing fatty oils for use in paints and varnishes	539
III. Fatty oils and waxes employed in paints, enamels, varnishes, and polishes	550
Sectional Bibliography	564

SECTION IX.—THE APPLICATION OF FATS TO FIBRES.

Introduction	567
I. The production of linoleum; water-proofing and insulating fabrics	569
II. The "wool oils" or "cloth oils"	575
III. The uses of fatty oils in the leather industries	580
Sectional Bibliography	583

SECTION X.—FATTY LUBRICANTS 584

Sectional Bibliography	590
