## INTRANASAL PROCEDURES

**Video 1:** Septoplasty and reduction of the inferior turbinates carried out through Le Fort I down-fracture

**Video 2:** Septoplasty and reduction of the inferior turbinates carried out through Le Fort I down-fracture

**Video 3:** Recontouring of the nasal floor, pyriform rims and anterior nasal spine region carried out during Le Fort I osteotomy

**Video 4:** Recontouring of the nasal floor, pyriform rims and anterior nasal spine region carried out during Le Fort I osteotomy

## AWAKE INTUBATION TECHNIQUES

**Video 5:** Awake fiberoptic nasotracheal intubation in patient with TMJ ankylosis

## ORTHOGNATHIC PROCEDURES: STEP-BY-STEP APPROACH

### Patient 1

**Video 6-1:** Patient preparation and draping

**Video 6-2:** Sagittal split ramus osteotomies: incision placement, dissection, and the cortical cuts

**Video 6-3:** Maxillary Le Fort I osteotomy

**Video 6-4:** Septoplasty and reduction of the inferior turbinates

**Video 6-5:** Removal of impacted maxillary wisdom teeth

**Video 6-6:** Continuing the Le Fort I osteotomy: removal of bony interferences, placement of the intermediate splint, and securing intermaxillary fixation

**Video 6-7:** Achieving the desired vertical midface dimension

**Video 6-8:** Placement of titanium plate and screw fixation across Le Fort I osteotomy

**Video 6-9:** Recontouring of the nasal floor, pyriform rims, and anterior nasal spine region

**Video 6-10:** Release of IMF: confirming the correct occlusion-removal of the intermediate splint-securing of the final splint

**Video 6-11:** Osseous genioplasty

**Video 6-12:** Splitting of each sagittal ramus osteotomy of the mandible and removal of impacted mandibular wisdom teeth

**Video 6-13:** Securing of intermaxillary fixation through the final splint

**Video 6-14:** Insertion of the transbuccal trocar, seating of the proximal segment, removal of bony interferences, and placement of bicortical screw fixation

**Video 6-15:** Release of intermaxillary fixation and confirmation of correct occlusion

**Video 6-16:** Wound closure

### Patient 2

**Video 7-1:** Patient preparation and draping

**Video 7-2:** Sagittal split ramus osteotomies: incision placement, dissection, and cortical cuts

**Video 7-3:** Maxillary Le Fort I osteotomy

**Video 7-4:** Septoplasty and reduction of the inferior turbinates

**Video 7-5:** Continuing the Le Fort I osteotomy: removal of bony interferences, placement of the intermediate splint, and securing intermaxillary fixation

**Video 7-6:** Achieving the desired vertical midface dimension

**Video 7-7:** Recontouring of the nasal floor, pyriform rims, and anterior nasal spine region

**Video 7-8:** Placement of titanium plate and screw fixation across the Le Fort I osteotomy

**Video 7-9:** Release of IMF: confirming the correct occlusion-removal of the intermediate splint-securing of the final splint

**Video 7-10:** Osseous genioplasty

**Video 7-11:** Splitting of each sagittal ramus osteotomy of the mandible

**Video 7-12:** Securing of intermaxillary fixation through the final splint

**Video 7-13:** Insertion of the transbuccal trocar, seating of the proximal segment, removal of bony interferences, and placement of bicortical screw fixation

**Video 7-14:** Release of intermaxillary fixation and confirmation of the correct occlusion

**Video 7-15:** Wound closure

**Video 7-16:** Anterior neck rejuvenation

## GRAFT HARVESTING

**Video 8:** Harvesting cancellous bone through the anterior iliac crest

**Video 9:** Harvesting a corticocancellous block graft from the anterior iliac crest

**Video 10:** Harvesting a rib cartilage graft

## OSSEOUS GENIOPLASTY

**Video 11:** Osseous genioplasty with horizontal advancement

**Video 12:** Osseous genioplasty with horizontal advancement
