PREFACE	VII
LIST OF PERIODICALS	XVII
OFFICIAL PUBLICATIONS	XXII
LIST OF COMMON ABBREVIATIONS AND SYMBOLS USED	XXIII

GENERAL INTRODUCTION

1. The structure of Carbon Compounds – Historical <i>by</i> E. H. RODD . . .	2
2. The Classification and Nomenclature of Carbon Compounds <i>by</i> E. H. RODD . . .	18
3. Literature and Documentation of Organic Chemistry <i>by</i> E. H. RODD . . .	23
4. Quantitative Analysis of Carbon Compounds and the Determination of Physical Constants and Molecular Weights by Micro- and Semimicro Methods <i>by</i> R. BELCHER	25
5. The Physical Properties of Carbon Compounds <i>by</i> H. D. SPRINGALL . . .	46
6. Crystallography of Carbon Compounds <i>by</i> A. F. WELLS	48
7. The Absorption of Light by Carbon Compounds <i>by</i> E. A. BRAUDE . . .	71
8. Modern Physico-chemical Views on Acids and Bases and their Application to Organic Substances <i>by</i> H. D. SPRINGALL	99
9. Stereochemistry of Carbon Compounds <i>by</i> E. E. TURNER	107
10. Mechanisms of Reactions of Carbon Compounds <i>by</i> E. D. HUGHES . . .	157
11. Free Radicals and Homolytic Reactions <i>by</i> D. H. HEY and W. A. WATERS . . .	195

ALIPHATIC COMPOUNDS

Chapter I. The Saturated or Paraffin Hydrocarbons. Alkanes

by P. J. GARNER and J. H. BEYNON

1. Introduction	221
2. Natural Occurrence of Paraffin Hydrocarbons	222
3. Methods of Preparation of Paraffin Hydrocarbons	223
4. Physical Properties of the Paraffins	227
a. Boiling Point	227
b. Melting Point	227
c. Density and Refractive Index	228
d. Absorption Spectra	229
e. Mass Spectra	229
f. Crystal Structure	229
g. Viscosity	230
5. Chemical Properties of the Paraffins	230
a. Thermal Reactions of the Paraffins	231
b. Oxidation of Paraffins	235

c. Halogenation	237
d. Nitration	240
e. Other Reactions with Inorganic Reagents	240
f. Reactions with Organic Reagents	242
6. Technical Production of Paraffin Hydrocarbons	243
a. From Natural Sources	243
b. Synthetic Methods	244
(i) Fischer-Tropsch Process, 244 – (ii) Alkylation Processes, 245	
(iii) Polymerisation of Olefines, 245	
7. Individual Members of the Paraffin Series	246

Chapter II. Unsaturated Hydrocarbons

by A. W. JOHNSON

1. Olefines or Alkenes, C_nH_{2n}	249
(i) Ethylene, 250 – (ii) Homologues of Ethylene, 253 – Properties and Reactions of the Olefines, 254	
2. Hydrocarbons, C_nH_{2n-2}	258
a. Acetylenes or Alkynes	258
(i) Acetylene, 258 – (ii) Homologues of Acetylene, 264	
b. Diolefines	265
(i) Allene Hydrocarbons, 265 – (ii) Hydrocarbons containing two Conjugated Double Bonds, 267 – (iii) Non-conjugated Diene Hydrocarbons, 269	
3. Hydrocarbons, C_nH_{2n-4}	270
a. Vinylacetylenes	270
b. Triolefines	271
4. Hydrocarbons, C_nH_{2n-6}	271
a. Diacetylenes	271
b. Divinylacetylenes	272
c. Tetra-olefines	272
5. Hydrocarbons of greater unsaturation	272

Chapter III. Halogen Derivatives of the Hydrocarbons

by A. W. JOHNSON and J. G. BUCHANAN

General Methods of Preparation of the Halogen Derivatives	274
Reactions of the Halogen Derivatives	275
1. Halogenated Paraffins	276
a. Monohalogeno-paraffins. Alkyl Halides, $C_nH_{2n+1}X$	276
b. Dihalogeno-paraffins, $C_nH_{2n}X_2$	276
c. Polyhalogeno-paraffins	277
2. Halogen Derivatives of the Olefines	279
3. Halogen Derivatives of the Acetylenes	283

Chapter IV. Monohydric Alcohols; their Ethers and Esters

by A. W. JOHNSON, I. R. BICK, J. G. BUCHANAN, W. E. HARVEY,

I. D. MORTON and R. QUAYLE

Introduction	285
1. Monohydric Alcohols	287

a. Saturated Alcohols, Paraffin Alcohols, $C_nH_{2n+1}OH$	296
(i) Methyl Alcohol, 297 - (ii) Ethyl Alcohol, 299 - (iii) Propyl Alcohols, 307, (iv) Butyl Alcohols, 308 - (v) Amyl Alcohols, 310 - (vi) Higher Saturated Alcohols, $C_nH_{2n-1}OH$, 313	
b. Unsaturated Alcohols	314
(i) Ethylenic Alcohols, $C_nH_{2n-1}OH$, 314 - (ii) Alcohols $C_nH_{2n-3}OH$, 317 - (iii) Alcohols $C_nH_{2n-5}OH$, 319 - (iv) Alcohols $C_nH_{2n-7}OH$, 320 - (v) Alcohols $C_nH_{2n-9}OH$, 320 - (vi) Alcohols $C_nH_{2n-11}OH$, 320	
2. Ethers.	321
a. Ethers of the Saturated Alcohols	322
b. Ethers of Unsaturated Alcohols.	324
3. Peroxides of the Alcohols and Ethers	325
a. Hydroperoxides.	326
b. Dialkyl peroxides	326
4. Esters of the Mineral Acids.	327
a. Alkyl Esters of the Halogen Acids, Alkyl Halides	329
b. Esters of Nitric Acid, Alkyl Nitrates	335
c. Esters of Nitrous Acid, Alkyl Nitrites	336
d. Esters of Sulphuric Acid.	337
e. Esters of Sulphurous Acid	340
f. Esters of Hypochlorous and Perchloric Acids	341
g. Esters of other Inorganic Oxy-acids	342

Chapter V. Sulphur Derivatives of the Alcohol Radicals

by A. W. JOHNSON and I. R. BICK

1. Mercaptans, Thio-alcohols or Alkyl Hydrosulphides	345
2. Sulphides or Thio-ethers	347
3. Alkyl Disulphides	348
4. Sulphonium Compounds	349
5. Sulfoxides and Sulphones.	351
6. Alkanesulphonic Acids.	352
7. Alkyl Thiosulphuric Acids, $RS \cdot SO_3H$	354
8. Alkyl Thiosulphonic Acids, $R \cdot SO_2 \cdot SH$	354
9. Alkanesulphinic Acids, $R \cdot SO_2H$	355

Chapter VI. Nitrogen Derivatives of the Alcohol Radicals

by J. WALKER

1. Nitro- and Nitroso-Compounds	357
a. Mononitro Compounds.	357
(i) Nitroparaffins, 357 - (ii) Nitro-olefines, 366 - (iii) Halogenonitroparaffins, 369	
b. Nitroso-paraffins	370
c. <i>pseudo</i> Nitroles or <i>meso</i> -Nitronitrosoparaffins	372
d. Nitrolic Acids	372
e. Dinitroparaffins.	373
f. Polynitroparaffins.	376
2. Amines and Quaternary Ammonium Compounds	378

Methods of Formation of Amines	380
(i) The Alkylation of Ammonia, or of Ammonia Derivates, 381 – (ii) Reduction of Various Types of Nitrogen Compounds, 382 – (iii) Degradative Methods, 383 – (iv) Miscellaneous Methods, 386	
Properties and Reactions of the Amines	388
a. (i) Saturated Amines, 396 – (ii) Quaternary Ammonium Bases, 399	
b. Unsaturated Amines and Ammonium Bases	401
c. N-Halogenoalkylamines	403
d. Sulphur Derivatives of the Alkylamines	404
e. Phosphorus, Arsenic, Boron, Bismuth and Silicon Derivatives of Secondary Amines	405
f. Nitrosoamines	405
g. Nitroamines (nitramines)	406
h. Alkylhydrazines	407
i. Alkyl Azo Compounds, Azoalkanes	409
j. Alkyl Azoxy Compounds.	410
k. Alkyl Diazo Compounds	411
l. Alkyl Azides	411
m. Diazoamino Paraffins	412
n. Tetra-alkyltetrazenes	412
o. Alkylhydroxylamines	413
p. Trialkylamine Oxides	414
q. Nitroso- β -alkylhydroxylamines	416

Chapter VII. Metal and Metalloid Compounds of the Alkyl Radicals

by J. CHATT

Introduction	417
Types of Organometallic and Organometalloid Compounds	418
Nomenclature	419
Preparation	419
Reactivity and Reactions	420
Reactions of Organomagnesium Compounds	422
a. Splitting of Single Bonds	422
b. Addition to Double Bonds	423
c. Reduction	425
Reactions of Organoarsenicals	425
1. Organic Compounds of Elements of Group 1	428
2. Organic Compounds of Elements of Group 2	429
a. The Alkaline Earth Metals Ca, Sr, Ba	429
b. Typical Elements and B sub-group, Be, Mg, Zn, Cd, Hg	430
(i) Beryllium, 430 – (ii) Magnesium, 430 – (iii) Zinc, 431 – (iv) Cadmium, 432	
(v) Mercury, 432	
3. Organic Compounds of Elements of Group 3	433
(i) Boron, 434 – (ii) Aluminium, 435 – (iii) Gallium, 436 – (iv) Indium, 436	
(v) Thallium, 436	
4. Organic Compounds of Elements of Group 4	437
(i) Silicon, 438 – (ii) Germanium, 440 – (iii) Tin, 440 – (iv) Lead, 440	
5. Organic Compounds of the Transition Elements.	442
(i) Platinum, 443 – (ii) Copper and Silver, 443 – (iii) Gold, 443	
6. Organic Compounds of Elements of Group 5	444

(i) Phosphorus, 445 – (ii) Arsenic, 447 – (iii) Antimony, 450 – (iv) Bismuth, 451	
7. Organic Compounds of Elements of Group 6	452
(i) Selenium, 452 – (ii) Tellurium, 452 – (iii) Polonium, 457	
Bibliography	457

Chapter VIII. Aldehydes and Ketones

by A. W. JOHNSON, J. G. BUCHANAN, D. T. ELMORE, W. E. HARVEY

and J. WALKER

Introduction	459
1. Saturated Aldehydes	461
a. Aldehydes, $C_nH_{2n+1}\cdot CHO$	461
b. Halogen Substitution Products of the Saturated Aldehydes.	478
c. Aldehyde Peroxides	480
d. Ethers and Esters of the Aldehyde Hydrates	481
(i) Hemi-acetals, 481 – (ii) Acetals, 481 – (iii) Aldehyde Dihalides and Halogeno- hydrins, 483 – (iv) Carboxylic Esters of the Aldehyde Hydrates, 485 – (v) Al- dehyde-bisulphites and Aldehyde Sulphoxalates, 486	
e. Sulphur Derivatives of the Saturated Aldehydes	487
(i) Thioaldehydes, Polymeric Thioaldehydes and their Sulphones, 487 – (ii) Sulfoxides and Sulphones from the Trithioaldehydes, 489 – (iii) Mercap- tals or Thioacetals and Alkylidene Sulphones, 490 – (iv) Alkane-1:1-disul- phonic Acids, 491	
f. Nitrogen-containing Derivatives of the Aldehydes.	492
(i) Compounds derived from Ammonia and Alkylamines with Aldehydes, 492 (ii) Aldoximes, 496 – (iii) Diazoparaffins, 497 – (iv) Azines and substituted Hydrazones, 500	
2. Unsaturated Aldehydes	501
a. Olefinic Aldehydes	501
b. Acetylenic Aldehydes	504
c. Polyolefinic Aldehydes.	504
3. Saturated Ketones	505
a. Ketones $C_nH_{2n}O$	505
b. Halogen substitution Products of the Ketones	518
c. Derivatives of the Ketone Hydrates.	520
(i) Ketone Acetals, Ketals, 520 – (ii) Ketone Halides, 520 – (iii) Ketone Bisulphites and Sulphoxylates, 521	
d. Sulphur Derivatives of the Saturated Ketones	521
(i) Thioketones and derived sulphones, 521 – (ii) Mercaptols and derived sulphones, 521	
e. Nitrogen Derivatives of the Ketones	522
(i) Nitro Compounds, 522 – (ii) Ammonium Derivatives, 522 – (iii) Hydroxyl- amine Derivatives. Ketoximes, 522 – (iv) Hydrazine Derivatives, 524 – (v) Ketone Semicarbazones, 526 – (vi) Miscellaneous Derivatives, 526	
4. Unsaturated Ketones and Ketens	527
a. Ketens	527
b. Olefinic Ketones	529
c. Diolefinic Ketones	533
d. Acetylenic Ketones	536

Chapter IX. Monobasic Carboxylic Acids

by A. W. JOHNSON, C. E. DALGLIESH and J. WALKER

Introduction	537
1. Paraffin Monocarboxylic Acids $C_nH_{2n+1} \cdot CO_2H$	540
a. Formic Acid and its Derivatives	540
(i) Formic Acid, 540 – (ii) Hydrocyanic Acid, 545 – (iii) Functional Derivatives of Formic Acid, 551 – (iv) Carbon Monoxide, <i>isonitriles</i> and Fulminic Acid, 556	
b. The Saturated Fatty Acids.	562
c. Functional Derivatives of the Fatty Acids	581
(i) Esters, 581 – (ii) Acid halides and mixed anhydrides with inorganic oxyacids, 588 – (iii) Carboxylic acid anhydrides, 591 – (iv) Peracids and Acyl peroxides, 593 – (v) Thio-acids, 593 – (vi) Amides, 595 – (vii) Hydrazides, 600 – (viii) Acid Azides, 602 – (ix) Nitriles or Alkyl Cyanides, 603 – (x) Amido chlorides, 606 – (xi) Imino ethers, 607 – (xii) Thioamides and Imino Thio-ethers 608 – (xiii) Amidines, 609 – (xiv) Hydroxamic Acids and Hydroxamic Acid Chlorides, 612 – (xv) Amidoximes, 613 – (xvi) Hydroxamic-oximes and Nitroso oximes, 614 – (xvii) Hydrazidines (Hydrazyls) and Amidrazones, 614 – (xviii) Ortho-fatty Acid Derivatives, 614	
d. Halogen Substitution Products of the Fatty Acids	615
2. Olefine Monocarboxylic Acids $C_nH_{2n-1}CO_2H$	623
3. Unsaturated Acids $C_nH_{2n-3}CO_2H$	641
a. Acetylenic Carboxylic Acids	641
b. Diolefine Carboxylic Acids	644
4. Triolefine Carboxylic Acids $C_nH_{2n-5}CO_2H$	646
5. More Highly Unsaturated Acids	647

Chapter X. Dihydric Alcohols or Glycols and Related Compounds

by A. W. JOHNSON, A. G. LONG and C. E. DALGLIESH

1. Paraffin Glycols.	648
a. 1:2-Glycols	658
b. 1:3-Glycols	660
c. 1:4-Glycols	661
d. 1:5-Glycols	661
e. 1:6-, 1:7-, 1:8-Glycols etc.	662
2. Unsaturated Glycols.	662
a. Olefinic Glycols.	662
b. Diolefinic Glycols	663
c. Acetylenic Glycols	663
d. Glycols of greater Unsaturation	664
3. Glycol Derivatives	664
a. Alkyl Ethers	664
b. Polyethylene Glycols	666
c. Cyclic Ethers. Alkylene Oxides. Epoxides	668
d. Esters of the Glycols	672
(i) Monohalogen Esters, Halohydrins, 672 – (ii) Dihalogen Esters. Alkylene Dihalides, 674 – (iii) Esters of Inorganic Acids, 678 – (iv) Esters of Carboxylic Acids, 680	

4. Sulphur Derivatives of the Glycols	682
a. Mercaptans and Thio-ethers	682
b. Alkylene Sulphides	684
c. Sulphones	684
d. Sulphonic Acids	685
5. Nitrogen Derivatives of the Glycols	688
a. Nitroso-compounds	688
b. Nitro-compounds	688
c. Monoamino Compounds derived from the Glycols	689
(i) Hydroxyalkylamines or alkanolamines, 689 – (ii) Halogen-substituted Alkylamines, 694 – (iii) Thiolalkylamines and Derivatives, 696 – (iv) Nitroalkylamines, 697	
d. Aliphatic Diamines	697

Chapter XI. Hydroxy-aldehydes and -ketones and related Compounds: Dicarbonyl Compounds

by A. W. JOHNSON, C. E. DALGLIESH, W. E. HARVEY and C. BUCHANAN

1. Hydroxyaldehydes. Aldehyde-alcohols	702
2. Nitro- and Amino-aldehydes	706
3. Ketone-alcohols or Ketols	708
a. Saturated Ketols	708
b. Olefinic Ketols	712
4. Nitrogen-containing Derivatives of the Keto-alcohols	713
a. Nitro-ketones	713
b. Amino-aldehydes and Amino-ketones	714
5. Dialdehydes	715
6. Keto-aldehydes	718
7. Diketones	719
a. α - or 1:2-Diketones	719
b. β - or 1:3-Diketones	721
c. γ - or 1:4-Diketones	723
d. 1:5-, 1:6- and 1:7-Diketones.	725
8. Nitrogen-containing Derivatives of the Dialdehydes, Aldehyde-ketones and Diketones	726
a. Oximes	726
(i) Monoximes, 726 – (ii) Dioximes, 728	
b. Hydrazine, Phenylhydrazine and Semicarbazide Derivatives	729
c. Diazoketones.	731
INDEX	733
