| Abstract, souhrn | 3 |
| List of publications relevant to habilitation thesis | 4 |
| Content | 5 |
| Introduction | 6 |
| 1 State of the art..... | 7 |
| 1.1 Pressure-affected viscosity..... | 8 |
| 1.1.1 Drag flow rheometry..... | 8 |
| 1.1.2 Pressure-driven flow rheometry..... | 11 |
| 1.2 Free volume dependent viscosity..... | 12 |
| 1.2.1 Viscosity free volume concept..... | 12 |
| 1.2.2 Simha–Somcynsky lattice–hole theory..... | 13 |
| 2 Experiments discussion..... | 16 |
| 2.1 Pressurized rheometry experiments..... | 16 |
| 2.1.1 Modified capillary rheometer..... | 16 |
| 2.1.2 Modified slit die extrusion rheometry..... | 22 |
| Application of pressure affected viscosity..... | 25 |
| 2.2 PVT and free volume dependent polymer viscosity analysis..... | 26 |
| 2.2.1 PVT data analysis and hole fraction calculation..... | 26 |
| 2.2.2 Hole fraction dependent viscosity..... | 28 |
| Implementation of free volume dependent viscosity..... | 37 |
| 3 Conclusions and future perspective..... | 39 |
| 4 Contribution to science and practise..... | 41 |
| 5 Nomenclature..... | 43 |
| 6 References..... | 46 |
| Curriculum vitae..... | 54 |
