About the Companion Website *xv*

Introduction *xvii*

- 1 Soil Composition 1**
 - 1.1 Phase Diagrams 1
 - 1.2 Application of Phase Diagrams: Compaction 3
 - 1.3 Coarse- and Fine-Grained Soils 6
 - 1.3.1 Coarse-Grained Soils 6
 - 1.3.2 Fine-Grained Soils 8
 - 1.4 Unified Soil Classification System 11
 - 1.5 Chapter Recap 12
 - Problems 12
 - Solutions 13

- 2 Stresses in the Ground 15**
 - 2.1 Vertical Total Stress 15
 - 2.2 Pore Water Pressure 17
 - 2.3 Vertical Effective Stress 18
 - 2.4 Horizontal Effective Stress 19
 - 2.5 Horizontal Total Stress 19
 - 2.6 Mohr Circles 20
 - 2.6.1 Flat Ground Example 23
 - 2.6.2 Sloping Ground Example 26
 - 2.7 Stresses in the Ground due to Surface Loads 28
 - 2.8 Chapter Recap 31
 - Problems 32
 - Solutions 33

3	Seepage	37
3.1	What Causes Seepage	38
3.2	Seepage-Related Pore Water Pressures	41
3.3	Hydraulic Gradient at Points of Interest	42
3.4	Flow Rate	43
3.5	Chapter Recap	47
	Problems	47
	Solutions	48
4	Consolidation	51
4.1	What Happens During Consolidation	51
4.2	Magnitude of Consolidation	53
4.2.1	Case A: Normally Consolidated Clay	54
4.2.2	Case B: Overconsolidated Clay	58
4.3	Changes in Stress State During Consolidation Loading and Unloading	60
4.4	Time-Rate of Consolidation	62
4.5	Chapter Recap	67
	Problems	67
	Solutions	68
5	Shear Strength	69
5.1	The Mohr–Coulomb Failure Line	69
5.2	Drained and Undrained Loading Conditions	71
5.3	Example Stability Problem with a Sand Foundation	75
5.4	Example Stability Problem with a Clay Foundation	78
5.5	Undrained Shear Strength for Partially Saturated Soils	84
5.6	Shear Strength for Changes in Groundwater Level	85
5.7	Chapter Recap	86
	Problems	87
	Solutions	88
6	Active and Passive Pressures	91
6.1	Active Pressures	91
6.2	Passive Pressures	94
6.3	Summary of Rankine’s Theory	97
6.4	Movements Required for Active and Passive Pressures	97
6.5	Chapter Recap	99
	Problems	100
	Solutions	100

7	Site Investigations	103
7.1	A General Approach to Site Investigations	103
7.1.1	Understand What Is Planned for the Site	103
7.1.2	Look for Existing Information About the Site	104
7.1.3	Visit the Site	104
7.1.4	Develop a Model and Identify Data Gaps	104
7.1.5	Develop a Subsurface Exploration Program	105
7.2	An Example Site Investigation	107
7.2.1	Understand What Is Planned for the Site	107
7.2.2	Look for Existing Information About the Site	108
7.2.3	Visit the Site	108
7.2.4	Develop a Model and Identify Data Gaps	108
7.2.5	Develop a Subsurface Exploration Program	109
7.3	Chapter Recap	117
