About the Author *ix*

Editors' Preface to the Manchester Physics Series *x*

Preface to First Edition *xi*

Preface to Second Edition *xiii*

About the Companion Website *xiv*

1	Simple Harmonic Motion	1
1.1	Physical Characteristics of Simple Harmonic Oscillators	1
1.2	A Mass on a Spring	2
1.2.1	A Mass on a Horizontal Spring	2
1.2.2	A Mass on a Vertical Spring	4
1.2.3	Displacement, Velocity and Acceleration in SHM	5
1.2.4	General Solutions for SHM and the Phase Angle ϕ	7
1.2.5	The Energy of a Simple Harmonic Oscillator	9
1.2.6	The Physics of Small Vibrations	11
1.3	The Pendulum	16
1.3.1	The Simple Pendulum	16
1.3.2	The Energy of a Simple Pendulum	18
1.3.3	The Physical Pendulum	21
1.3.4	Numerical Solution of SHM	23
1.4	Oscillations in Electrical Circuits: Similarities in Physics	26
1.4.1	The <i>LC</i> Circuit	26
1.4.2	Similarities in Physics	27
	Problems 1	29
2	The Damped Harmonic Oscillator	35
2.1	Physical Characteristics of Damped Harmonic Oscillators	35
2.2	The Equation of Motion for a Damped Harmonic Oscillator	36
2.2.1	Light Damping	37
2.2.2	Heavy Damping	40
2.2.3	Critical Damping	40
2.3	Rate of Energy Loss in a Damped Harmonic Oscillator	43
2.3.1	The Quality Factor <i>Q</i> of a Damped Harmonic Oscillator	44
2.4	Damped Electrical Oscillations	47
	Problems 2	49

3	Forced Oscillations	53
3.1	Physical Characteristics of Forced Harmonic Motion	54
3.2	The Equation of Motion of a Forced Harmonic Oscillator	54
3.2.1	Undamped Forced Oscillations	54
3.2.2	Forced Oscillations with Damping	57
3.3	Power Absorbed During Forced Oscillations	63
3.4	Resonance in Electrical Circuits	68
3.5	Transient Phenomena	70
3.6	The Complex Representation of Oscillatory Motion	72
3.6.1	Complex Numbers	72
3.6.2	The Use of Complex Numbers to Represent Physical Quantities	75
3.6.3	Use of the Complex Representation for Forced Oscillations with Damping	76
	Problems 3	78
4	Coupled Oscillators	85
4.1	Physical Characteristics of Coupled Oscillators	85
4.2	Normal Modes of Oscillation	86
4.3	Superposition of Normal Modes	89
4.4	Oscillating Masses Coupled by Springs	93
4.5	Forced Oscillations of Coupled Oscillators	101
4.6	Transverse Oscillations	104
	Problems 4	108
5	Travelling Waves	115
5.1	Physical Characteristics of Waves	116
5.2	Travelling Waves	116
5.2.1	Travelling Sinusoidal Waves	119
5.3	The Wave Equation	122
5.4	The Equation of a Vibrating String	124
5.5	The Energy in a Wave	126
5.6	The Transport of Energy by a Wave	129
5.7	Waves at Discontinuities	130
5.8	Waves in Two and Three Dimensions	134
5.8.1	Waves of Circular or Spherical Symmetry	138
	Problems 5	141
6	Standing Waves	147
6.1	Standing Waves on a String	147
6.2	Standing Waves as the Superposition of Two Travelling Waves	153
6.3	The Energy in a Standing Wave	155
6.4	Standing Waves as Normal Modes of a Vibrating String	157
6.4.1	The Superposition Principle	157
6.4.2	The Superposition of Normal Modes	158
6.4.3	The Amplitudes of Normal Modes and Fourier Analysis	161
6.4.4	The Energy of Vibration of a String	163
	Problems 6	165

7	Interference and Diffraction of Waves	169
7.1	Interference and Huygens' Principle	169
7.1.1	Young's Double-Slit Experiment	172
7.1.2	Michelson Spectral Interferometer	178
7.2	Diffraction	180
7.2.1	Diffraction at a Single Slit	181
7.2.2	Circular Apertures and Angular Resolving Power	185
7.2.3	Double Slits of Finite Width	187
	Problems 7	188

8	The Dispersion of Waves	193
8.1	The Superposition of Waves in Non-Dispersive Media	193
8.1.1	Beats	194
8.1.2	Amplitude Modulation of a Radio Wave	196
8.2	The Dispersion of Waves	197
8.2.1	Phase and Group Velocities	197
8.3	The Dispersion Relation	201
8.4	Wave Packets	204
8.4.1	Formation of a Wave Packet	205
	Problems 8	209

Appendix: Solutions to Problems 215

Index 237
