

CONTENTS

1.	INTRODUCTION.....	3
1.1.	Definitions and basic concepts.....	3
1.2.	Newton's laws.....	4
2.	DynamiCS OF A PARTICLE.....	5
2.1.	Newton's equations of motion.....	5
2.2.	D'Alembert's principle – method of inertia forces.....	10
2.3.	Motion of a particle in a noninertial coordinate system.....	11
3.	DYNAMICS OF A SYSTEM OF PARTICLES.....	12
3.1.	Newton's equations of motion for a system of particles.....	12
3.2.	Equations of motion formed by d'Alembert's method.....	14
3.3.	Meaning of dynamics of systems of particles.....	15
4.	InerTIAL CHARACTERISTICS OF A BODY.....	15
4.1.	Definitions of basic quantities.....	15
4.2.	Mass moments of inertia for parallel axes (parallel axes theorem).....	19
4.3.	Computation of moments of inertia of a rigid body.....	20
4.4.	Moment of inertia of a body with respect to an arbitrary axis and principal axes of inertia.....	21
5.	DynamiCS OF A BODY.....	25
5.1.	Translational motion of a body.....	26
5.1.1.	Newton's equations of motion.....	26
5.1.2.	D'Alembert's equations of motion.....	27
5.2.	Rotational motion of a body.....	31
5.2.1.	Newton's equations of motion.....	32
5.2.2.	D'Alembert's equations of motion.....	34
5.3.	General plane motion of a body.....	36
5.3.1.	Newton's equations of motion.....	37
5.3.2.	D'Alembert's equations of motion.....	39
5.4.	Spherical motion of a body.....	40
5.4.1.	Euler's equations of motion.....	41
5.5.	General spatial motion of a body.....	44
5.5.1.	Newton's equations of motion.....	44
5.5.2.	D'Alembert's equations of motion.....	46
6.	DynamiCS OF SYSTEMS OF RIGID BODIES.....	47
6.1.	Method of isolation.....	47
6.1.1.	Newton's equations of motion.....	48
6.1.2.	D'Alembert's equations of motion.....	49
6.2.	General principles of dynamics.....	51
6.2.1.	Kinetic energy of a system of bodies.....	51
6.2.2.	Motion of the mass center of a system of bodies.....	53
6.2.3.	Linear momentum of a system of bodies.....	53
6.2.4.	Angular momentum of a system of bodies.....	54
6.3.	Method of reduction of mass and force quantities.....	54

7.	THEORY OF VIBRATION	59
7.1.	Basic concepts	59
7.2.	Systems with one degree of freedom	60
7.3.	Equation of motion of a vibrating system	62
7.4.	Free undamped vibration of a system with one degree of freedom.....	66
7.5.	Free damped vibration of a system with one degree of freedom.....	68
	LiteraturE	70
	CONTENTS.....	71
